

mujhe ek software build karni h DK Mishra Motihari Mathematics coaching ke liye

Bilkul 👍 DK Mishra Motihari Mathematics Coaching ke liye hum ek **complete Coaching Management Software / ERP** bana sakte hain.

Agar aap chahte ho ki software professional ho aur future mein coaching ke multiple branches bhi handle kar sake, to main ise sirf attendance/fees software ke bajay **complete CoachingOS** ki tarah design karunga.

Proposed Software

Name: DK Mishra Mathematics Coaching Management System

1. Admin Dashboard

- Total Students
- Active Batches
- Today's Attendance
- Pending Fees
- Today's Classes
- New Admissions
- Fee Collection
- Recent Activities
- Monthly revenue/collection charts

2. Student Management

- Student registration
- Student profile
- Photo & basic details
- Parent/Guardian details
- Class
- Batch

- Roll number
- Admission date
- Contact details
- Documents
- Student status: Active / Inactive / Completed

3. Batch Management

- Create batches
- Class 9 / 10 / 11 / 12 etc.
- Batch timing
- Room/classroom
- Faculty
- Maximum capacity
- Student list
- Batch-wise attendance
- Batch-wise fees

4. Attendance

Teacher/Admin can mark:

Present / Absent / Late / Leave

Features:

- Daily attendance
- Batch-wise attendance
- Student attendance history
- Monthly attendance percentage
- Absence report
- Parent notification later add kar sakte hain

5. Fees Management

- Admission fee
- Monthly fee
- Installment system
- Paid amount

- Pending amount
- Due date
- Payment history
- Receipt generation
- Fee reminders
- Discount/scholarship
- Payment modes: Cash / UPI / Bank

6. Test & Examination System

Ye mathematics coaching ke liye particularly useful hoga.

- Create test
- Chapter-wise test
- Weekly test
- Monthly test
- Mock test
- Marks entry
- Rank calculation
- Batch-wise ranking
- Student performance
- Subject/chapter performance
- Result generation

Example:

Test: Quadratic Equations

Total Marks: 50

Student	Marks	Rank
Rahul	47	1
Aman	44	2
Priya	42	3

7. Study Material

Teacher upload kar sakta hai:

- PDF Notes

- Mathematics Questions
- Assignments
- Previous Year Papers
- Solutions
- Important Questions
- Video links

Students apne dashboard se access kar sakenge.

8. Homework / Assignment

Teacher:

Create Assignment → Select Batch → Set Deadline

Student:

View → Submit → Teacher Checks

Future mein PDF/image submission bhi add kar sakte hain.

9. Student Portal

Student login ke baad:

text

Dashboard

- |—— My Profile
- |—— My Batch
- |—— Attendance
- |—— Fees
- |—— Tests
- |—— Results
- |—— Assignments
- |—— Study Material
- |—— Notices
- |—— Notifications

10. Parent Portal

Parents ko bhi separate login diya ja sakta hai.

They can see:

- Child attendance
- Fee status
- Test results

- Rank
- Homework
- Notices
- Teacher remarks

11. Notifications

Future-ready notification system:

- Fee due reminder
- Fee payment confirmation
- Absent notification
- Test result published
- New assignment
- New study material
- Important announcement

Channels:

In-app → Email → WhatsApp → SMS

12. Teacher Panel

Teacher ke dashboard mein:

- My Batches
- Students
- Attendance
- Homework
- Tests
- Marks
- Study Material
- Notices
- Student Performance

13. Admin / Owner Panel

Owner ko complete control:

text

Dashboard
Students

Teachers
Batches
Attendance
Fees
Tests
Results
Assignments
Study Material
Notices
Reports
Settings

14. Reports

Important reports:

- Daily collection
- Monthly collection
- Pending fees
- Student attendance
- Batch attendance
- Test performance
- Top performers
- Weak students
- Admission report
- Student growth
- Revenue report

Recommended Technology

Agar aap khud development karoge, main ye stack recommend karunga:

Frontend

- React
- Vite
- TypeScript
- Tailwind CSS

Backend

- Node.js

- Express
- TypeScript

Database

- PostgreSQL
- Prisma ORM

Authentication

- JWT
- Role Based Access Control

Deployment

- Frontend → Vercel
- Backend → Railway
- Database → PostgreSQL/Railway

Roles

text

Main Idea

Main software ko **3 major interfaces** mein divide karunga:

Admin Web App

For owner/admin

Teacher Dashboard

For teachers

Student/Parent Portal

Mobile-friendly interface

Sabse pehle kya banana chahiye?

Main direct coding start karne ke bajay pehle complete **SRS + database architecture + page structure + UI flow** finalize karne ki recommendation dunga.

Phir development ko phases mein:

Phase 1: Authentication + Dashboard

Phase 2: Students + Teachers + Batches

Phase 3: Attendance

Phase 4: Fees + Receipts

Phase 5: Tests + Results

Phase 6: Study Material + Assignments

Phase 7: Notifications

Phase 8: Reports + Analytics

Phase 9: Production Deployment

Isse project manageable rahega aur baad mein features add karna easy hoga.

2026-09-25 11:37:15 You 

only maths padhate h ye or topic wise test hoti h fir pure subject or topic wise practics set or questions or biometrics attendance ye to unki features ho gyi or baki ka mai kya features add kr sakti ho jo unko helpful ho or or ek ai jo doubt dolving ho questions ki solutions ho test khatm hone pr uska soltuons or hmlog aaj ke time me kya kya features de sakte h ek coaching ko deeply research kr ke batao mujhe

 ChatGPT gpt-5-6

Haan — aur kyunki **DK Mishra Motihari Mathematics Coaching** sirf **Mathematics** padhata hai, main generic coaching ERP banane ke bajay ise “**Maths Learning + Practice + Test Intelligence + Attendance + Parent Communication**” platform banaunga.

Maine current 2026 coaching platforms aur CBSE ke current mathematics/assessment framework ko compare karke dekha. Aaj ke systems mein sirf fees/attendance enough nahi hai; **chapter-level analytics, adaptive practice, AI doubt solving, question generation, parent communication aur intervention alerts** important differentiators ban rahe hain. ([Vtava Technologies](#))

Aur CBSE ke 2026–27 Mathematics curriculum mein bhi rote learning ke bajay **problem-solving, logical reasoning, mathematical communication, modelling, computational thinking aur competency-based learning** par emphasis hai. (CBSE Academic)

 Main DK Mishra ke liye ye concept banaunga

DK Mishra Mathematics Learning OS

Iska core loop hoga:

Teach → Practice → Test → Analyse → Identify Weakness → AI Doubt → Targeted Practice → Retest → Improve

Yahi software ka sabse powerful part ho sakta hai.

1. Complete Mathematics Topic Library

Sabse pehle Mathematics ko proper hierarchy mein todna chahiye:

text

Class

↓

Subject: Mathematics

↓

Chapter

↓

Topic

↓

Sub-topic

↓

Question

Example:

text

Class 10

└── Mathematics

└── Quadratic Equations

├── Standard Form

├── Factorisation

├── Quadratic Formula

├── Nature of Roots

├── Word Problems

└── Graphical Interpretation

Har question ko metadata mile:

- Chapter
- Topic
- Sub-topic
- Difficulty
- Question type
- Concept
- Marks
- Expected solving time
- Solution
- Hint
- Common mistake
- Exam relevance

Isse baad mein **AI analytics** bahut powerful ho jayegi.

2. Topic-wise Practice Engine

Aapne jo feature bataya hai, usko aur advanced bana sakte hain.

Student choose kare:

Quadratic Equations → Factorisation → Practice

Phir options:

text

10 Questions
25 Questions
50 Questions
Custom

Difficulty:

text

Easy
Medium
Hard
Olympiad / Challenge

Aur ek aur important feature:

Weak Topic Practice

System automatically bole:

"Aapne Quadratic Equations mein Nature of Roots ke questions mein 42% accuracy achieve ki hai. 15 targeted questions practice karein."

Ye normal question bank se kaafi better hai.

3. Adaptive Practice

Ye mujhe software ka **major differentiator** banana chahiye.

Student ke previous answers ko analyse karke system difficulty change kare.

Example:

text

Question 1 → Easy → Correct
Question 2 → Medium → Correct
Question 3 → Medium → Wrong
Question 4 → Easy → Correct
Question 5 → Medium → Wrong

System conclude kare:

Concept partially understood.

Phir easier conceptual questions + hints de.

Research literature mein adaptive tutoring ke mechanisms mein difficulty, sequencing, practice amount, hints aur explanations ko learner data ke according adjust karna discuss kiya gaya hai; lekin adaptivity ko automatically effective maan lena sahi nahi hai—implementation aur teacher mediation matter karte hain. ([Frontiers](#))

Isliye main AI ko **teacher replacement** nahi, **teacher assistant** banaunga.

4. AI Maths Doubt Solver

Ye software ka flagship feature ho sakta hai.

Student:

 **Question ki photo upload kare**

AI:

text

Question detected

Given:

...

Required:

...

Step 1

...

Step 2

...

Step 3

...

Final Answer:

...

Lekin sirf answer nahi.

AI ko 4 modes dene chahiye:

1. Full Solution

Complete step-by-step solution.

2. Hint Mode

Sirf next step ka hint.

3. Explain Concept

"Is question mein quadratic formula kyu use hua?"

4. Find My Mistake

Student apna handwritten solution upload kare.

AI identify kare:

"Step 3 mein sign error hua hai."

Ye mathematics coaching ke liye bahut valuable feature hoga.

5. AI + Teacher Hybrid Doubt System

AI har doubt solve kare, lekin difficult doubts teacher ko escalate ho sakte hain.

Teacher dashboard mein:

Unresolved Doubts: 17

Teacher dekh sake:

- Question
- Student
- AI response
- Student's attempt
- Teacher solution

6. 🧠 "Why I Got Wrong?" Engine

Ye bahut useful feature hai.

Test ke baad system sirf:

6/10

na dikhaye.

Instead:

Error Analysis

text	
Concept Error	2
Calculation Error	1
Formula Error	1
Sign Error	1
Silly Mistake	1

Phir:

Recommended Practice:

Sign Errors → 10 Questions

Formula Application → 15 Questions

7. Test Analysis — बहुत deep

Aapne topic-wise tests already bataye.

Main test analytics ko bahut advanced banaunga.

Test ke baad:

Student Report

text

Score	42/50
Accuracy	84%
Attempted	48/50
Correct	42
Wrong	6
Skipped	2
Time	38 min

Then:

Topic Analysis

Topic	Accuracy
Factorisation	92%
Quadratic Formula	86%
Nature of Roots	61%
Word Problems	55%

Student ko instantly pata chale:

Your weakest area: Word Problems

8. 🌐 Student Mathematics Mastery Map

Ye ek beautiful visual dashboard ho sakta hai.

Har chapter ka status:

- Mastered
- Learning
- Needs Attention

Isse student ko apni actual position samajh aayegi.

9. 🔄 Automatic Retest

Suppose:

Test: Quadratic Equations

Student scored 54%.

System automatically recommend kare:

"Retest recommended after completing targeted practice."

Student practice kare.

Then:

Retest

54% → 72% → 86%

Ye **learning improvement graph** generate karega.

10. 📈 Progress Timeline

Student ka pura journey:

July
Quadratic → 52%

August
Quadratic → 68%

September
Quadratic → 81%

October
Quadratic → 91%

Student aur parent dono ko improvement visible hoga.

11. 🏆 Leaderboard

Coaching mein motivation ke liye:

Weekly

- Highest score
- Most improved
- Best accuracy
- Most practice
- Best attendance

Lekin sirf topper leaderboard nahi.

"Most Improved"

Example:

Rahul: 48% → 79% **+31%**

Isse weaker students bhi motivated rahenge.

12. 🎮 Gamification

Students earn:

🏆 Badges

Examples:

7 Day Practice Streak

100 Questions Solved

Chapter Master

5 Tests Completed

90% Accuracy

Most Improved

Perfect Score

Points ko leaderboard se connect kar sakte ho.

13. 📷 Handwritten Answer Evaluation

Mathematics coaching ke liye ye advanced feature hai.

Student handwritten solution upload kare.

AI check kare:

- Correct method?
- Correct formula?
- Calculation?
- Final answer?
- Missing steps?
- Sign mistake?

Teacher final verification kar sakta hai.

14. 🖋️ Question Generator

Teacher ke liye:

text

Chapter: Quadratic Equation
Topic: Nature of Roots
Difficulty: Medium
Questions: 20

AI generate kare:

- Questions
- Answers
- Solutions

- Difficulty
- Topic mapping

Teacher **Review** → **Edit** → **Publish** kare.

Current coaching platforms bhi AI question-paper generation aur question banks ko incorporate kar rahe hain. (TutionMat)

Important: **AI-generated questions ko automatically student ko publish nahi karna chahiye. Teacher approval mandatory rakho.**

15. Test ke turant baad Solution Book

Aapne jo feature bola:

Test khatam hone ke baad solution.

Isko aur better bana sakte ho.

Test submit:

Result

42/50

Then:

[View Detailed Solutions](#)

हर question:

text

Question

Your Answer

Correct Answer

Step-by-step Solution

Concept Used

Common Mistake

Practice Similar Questions

Aur:

"Practice This Question Type"

button.

16. Similar Question Generator

Student question solve nahi kar paya.

Button:

Give Me 5 Similar Questions

AI same concept ke:

text

Easy

Medium

Medium

Hard

Challenge

questions generate kare.

17. Spaced Revision System

System student ko automatically remind kare:

"You studied Polynomials 12 days ago. Revision recommended."

Phir:

5-question revision quiz

Ye long-term retention ke liye useful learning workflow hai.

18. Personal Study Planner

Student ke test aur weakness ke basis par:

text

Monday

Polynomials - 30 min

Tuesday

Quadratic Equations - 45 min

Wednesday
Geometry - 30 min

Thursday
Weak Topic Practice - 40 min

AI automatically schedule suggest kare.

19. 📱 Parent Dashboard

Parents ke liye बहुत useful.

Parent ko ye dikhna chahiye:

text

Student: Rahul

Attendance	94%
Tests	18
Average Score	78%
Practice	1,240 Q
Weak Topics	3
Improvement	+14%

Parent ko daily marks ka spam nahi.

Instead **weekly progress report**:

Rahul improved from 68% to 77% this week.

20. 🚨 Early Warning System

Ye coaching owner ke liye बहुत valuable feature hai.

System automatically identify kare:

At Risk Students

text

Attendance	↓
Test score	↓
Practice	↓
Doubts	↑

Then:

● Needs Attention

Example:

Aman has shown a 17% decline in Mathematics performance over the last 3 tests.

Teacher/mentor ko alert.

21. 📊 Teacher Dashboard

Teacher ko sirf students ki list nahi milni chahiye.

Teacher dashboard:

text

Today's Classes
Today's Attendance
Pending Doubts
Tests
Weak Students
Weak Topics
Recent Results

Class-level analysis

Teacher ko pata chale:

"Class 10A mein 63% students ko quadratic word problems mein difficulty hai."

Ab teacher next lecture us concept ko dubara explain kar sakta hai.

CBSE ka competency-based framework bhi assessment ko learning outcomes aur specific skills ke evidence se connect karta hai. ([CBSE Academic](#))

22. 🎯 Teacher ko "What should I teach again?" batana

Ye **AI Teaching Insights** hona chahiye.

Example:

Recommendation

68% students struggled with: **Pair of Linear Equations → Word Problems**

Suggested action: Conduct a 20-minute remedial session + assign 10 medium questions.

This is much more useful than simply showing a graph.

23. Daily 10 Questions

Student ko daily:

Today's 10 Maths

mil sakte hain.

Questions personalized hon:

- 4 weak-topic questions
- 3 revision questions
- 2 current chapter questions
- 1 challenge question

24. Daily Challenge

Example:

Today's Challenge

Can you solve this in under 3 minutes?

Gamification + practice.

25. Formula & Concept Bank

Class-wise:

text

Formula Bank

- |— Algebra
- |— Geometry
- |— Trigonometry
- |— Mensuration
- |— Statistics
- |— Probability

But sirf formulas nahi:

Formula → Meaning → When to use → Example → Practice

26. Mistake Book / My Mistakes

Ye feature main **must-have** rakhunga.

Har student ka personal:

"My Mistake Book"

System automatically save kare:

- Wrong questions
- Wrong concept
- Wrong formula
- Calculation mistakes
- Questions skipped

Student kabhi bhi:

Practice My Mistakes

kar sake.

Ye Mathematics coaching ke liye extremely useful workflow hai.

27. 🧑‍🎓 Student "Ask Teacher" Feature

AI ke saath:

Ask Teacher

Student question submit kare.

Teacher dashboard:

12 pending doubts

Teacher answer kare.

Answer future ke liye save bhi ho sakta hai.

28. 📺 Recorded Class + AI Notes

Agar coaching future mein lectures record karti hai:

Teacher video upload kare.

AI:

Video → Notes → Important Concepts → Questions → Quiz

Current education platforms are moving toward lecture-to-content workflows where AI can generate notes, flashcards and practice questions, alongside analytics. ([czed](#))

29. 📶 Hindi + English AI

Motihari/Bihar audience ke liye main bilingual support zaroor rakhunga.

Student likhe:

"Sir ye question samajh nahi aa raha."

AI Hindi/Hinglish mein explain kare.

Student choose kare:

Hindi | English | Hinglish

30. 📱 WhatsApp Integration

Parent/student ko:

Attendance

Rahul attended today's class.

Test

Quadratic Equations Test Result: 42/50

Fee

Monthly fee due on 5 October.

Weekly report

Rahul's performance improved by 8% this week.

Indian coaching platforms increasingly include WhatsApp-based parent communication and automated reminders. ([CoachPlus](#))

31. 🖐️ Biometric Attendance

Aapne ye already identify kiya hai.

But attendance ko sirf:

Present / Absent

mat rakho.

Use:

text

Biometric
↓
Student identified
↓
Batch identified
↓
Lecture identified
↓
Attendance marked
↓
Parent notification

Analytics:

- Monthly attendance
- Batch attendance
- Attendance streak
- Late arrivals
- Frequent absence
- Attendance vs marks correlation

32. Owner Analytics

Owner ko ek powerful dashboard:

text

Total Students
Active Students
Today's Attendance
Tests Conducted
Average Score
Average Attendance
Fees Collected
Pending Fees
AI Doubts
Students At Risk

Aur sabse important:

Coaching Performance

text

Student Retention
Average Improvement
Test Participation
Attendance Rate
Practice Activity
Chapter Mastery

33. Student Search / Smart Search

Admin likhe:

"Show students below 60% in Algebra."

System result de.

Ya:

"Show students absent more than 3 times this month."

Ya:

"Which students improved the most?"

Future mein AI natural-language admin assistant bhi banaya ja sakta hai. Kuch current coaching platforms already institute data ke upar AI assistants use kar rahe hain. ([DeskFlux](#))

34. Faculty Analytics

Agar future mein multiple maths teachers hain:

- Classes taken
- Students handled
- Test performance
- Attendance
- Doubts resolved
- Content uploaded

35. Digital ID Card

Student:

DK Mishra Mathematics Coaching

Digital student ID:

text

Photo

Name

Student ID

Class

Batch

QR Code

QR code se profile/attendance verification bhi ho sakta hai.

36. 📢 Notice Board

Admin:

- Holiday
- Test announcement
- New batch
- Exam schedule
- Important notice

One-click publish.

37. 🎓 Parent-Teacher Meeting Module

System automatically suggest kare:

"Rahul's performance has declined in last 3 tests. Parent meeting recommended."

Teacher notes:

- Strength
- Weakness
- Improvement plan
- Parent feedback

38. 🏆 Scholarship / Performance System

Future mein:

- Top scorer
- Most improved

- Consistent performer
- Attendance award

ke basis par scholarship/reward tracking.

39. Automatic Reports

One click:

Student Report Card

PDF:

text

Student Details

Attendance

Test Performance

Chapter Mastery

Practice

Weak Topics

Improvement

Teacher Remarks

AI Recommendations

Parent ko share kar sakte hain.

40. Sabse advanced feature: "Maths Digital Twin"

Main ek future feature aise design karunga:

Student Mathematics Profile

System student ke har interaction ko understand kare:

text

Student

|

|—— Concepts Mastered

|—— Concepts Weak

|—— Common Errors

|—— Question Difficulty

|—— Speed

|—— Accuracy

|—— Attendance

|—— Practice

- └── Test Performance
- └── Doubt History

Then system kahe:

Current Mathematics Mastery: 73%

Aur explain kare **73% kaise calculate hua.**

Opaque AI score nahi — transparent metrics.

Main software ko 6 modules mein divide karunga

MODULE 1 — Institute Management

text

Students
Batches
Teachers
Attendance
Biometric
Timetable
Parents
Notifications

MODULE 2 — Mathematics Learning

text

Classes
Chapters
Topics
Subtopics
Concepts
Formula Bank
Study Material
Videos

MODULE 3 — Practice

text

Question Bank
Topic Practice
Practice Sets

Adaptive Practice
Daily 10
Weak Topic Practice
Mistake Book
Revision

MODULE 4 — Assessment

text

Topic Test
Chapter Test
Full Subject Test
Mock Test
Online Test
Offline Test
Rank
Percentile
Detailed Analysis
Solutions

MODULE 5 — AI

text

AI Doubt Solver
Photo → Solution
Handwritten Solution Check
AI Hint
AI Concept Explanation
Similar Questions
AI Question Generator
AI Performance Analysis
AI Study Planner
Teacher AI Assistant

MODULE 6 — Analytics

text

Student Analytics
Batch Analytics
Topic Analytics
Teacher Analytics
Parent Reports
Weak Student Detection

★ मेरी नजर में सबसे important 15 features

Agar aap **MVP** banana chahte ho, to pehle ye build karo:

Priority	Feature
🔥 1	Biometric Attendance
🔥 2	Topic/Chapter Question Bank
🔥 3	Topic-wise Practice
🔥 4	Topic-wise Test
🔥 5	Chapter Test
🔥 6	Full Mathematics Test
🔥 7	Automatic Result + Rank
🔥 8	Detailed Test Analysis
🔥 9	Automatic Solutions
🔥 10	AI Photo Doubt Solver
🔥 11	Mistake Book
🔥 12	Weak Topic Detection
🔥 13	Personalized Practice
🔥 14	Parent Progress Dashboard
🔥 15	Teacher Analytics

Phase 2

- Adaptive Practice
- AI Question Generator
- AI Study Planner
- Handwritten Solution Checker
- WhatsApp
- Gamification

- Daily Challenge
- Automatic Reports
- Early Warning System

Phase 3

- Recorded lectures
- AI-generated notes
- AI teacher assistant
- Natural-language admin assistant
- Advanced predictive/diagnostic analytics
- Multi-branch support
- Mobile apps

सबसे important बात

मैं इसे "Coaching Management Software" नहीं बनाऊँगा।

मैं इसे position/design करूँगा as:

AI-Powered Mathematics Learning & Coaching Management Platform

क्योंकि attendance, fees, batch management लगभग हर coaching software दे रहा है. Current market mein differentiation increasingly **AI tutoring + assessment + analytics + personalised learning** की तरफ जा रहा है. (czed)

और DK Mishra की खासियत Mathematics-only है, इसलिए हम generic ERP से कहीं ज्यादा deep **Maths intelligence layer** बना सकते हैं।

सबसे powerful loop:

Biometric Attendance → Class → Topic → Practice → Test → Question-level Analysis → Weak Concept Detection → AI Explanation → Targeted Practice → Retest → Improvement Report → Parent/Teacher Insight

यही पूरा system DK Mishra coaching के लिए genuinely useful बना सकता है।

2026-09-25 11:40:02

You 

हाँ। मैंने पहले **actual DK Mishra Mathematics, Motihari** को अलग से research किया है, ताकि आगे जो software architecture बनाएं वह किसी generic coaching के लिए नहीं बल्कि **इसी coaching के actual model** के हिसाब से हो।

मुझे अभी जो **verified public information** मिली

D.K.MISHRA MATHEMATICS TODAY

- Google/business data में यह **Coaching Center** के रूप में listed है।
- Location: **M.S. College** के पास, **Red Bungalow** के पीछे/राम शरण गेट वाली गली, **Chandmari, Motihari, Bihar 845401**.
- Current business listing में **4.8/5 rating और 137 reviews** दिखाई दे रहे हैं।
- Listed hours लगभग **सुबह 6 बजे से रात 8 बजे तक**, पूरे सप्ताह हैं।
- एक अलग Justdial listing में इसी नाम का **D K Mishra, Station Road, Motihari** भी मिलता है, जिसका address M.S. College के right/Behind the Red Bungalow दिया गया है और 4.7 rating/16 ratings दिखाई जाती हैं।
([Justdial](#))

एक जरूरी सावधानी

Search में **D K Mishra** नाम के दूसरे **mathematics teachers/authors** भी मिलते हैं—जैसे Lucent की Mathematics books के author D K Mishra और अलग-अलग cities में faculty profiles। ([Exam360 Shop](#))

इसलिए मैं उन unrelated D.K. Mishra profiles की information को **Motihari coaching की information नहीं मान रहा हूँ**।

अब research का अगला step

Public web पर अभी मुझे DK Mishra Mathematics Motihari की कोई स्पष्ट official website/course catalog नहीं मिला। इसलिए अगर हम software को वास्तव में उनकी current working process के अनुसार बनाना चाहते हैं, तो मुझे उनकी **actual internal workflow** समझनी होगी।

आपने जो बताया है, उससे अभी हमारे पास ये confirmed features हैं:

DK Mishra Mathematics Today

- Mathematics-focused coaching
- Topic-wise tests
- Full-subject tests
- Topic-wise practice sets

→ Question bank/practice questions

→ Biometric attendance

→ Test के बाद solutions

अब मैं अगली research में specifically ये चीजें निकालना चाहूँगा:

1. कौन-कौन सी **classes** पढ़ाई जाती हैं
2. CBSE / ICSE / Bihar Board / competitive exams में से क्या target है
3. कितने प्रकार के batches हैं
4. उनकी current test methodology
5. test में कितने questions/marks/time होते हैं
6. topic → chapter → subject structure कैसे है
7. practice sets कैसे दिए जाते हैं
8. students को notes/material कैसे मिलता है
9. biometric attendance का actual workflow
10. parents को अभी कैसे information दी जाती है
11. result/rank कैसे बनाया जाता है
12. doubt solving अभी कैसे होती है
13. teachers/admin का current workflow
14. coaching की social-media presence
15. students/reviews में repeatedly कौन-सी चीजें mention होती हैं
16. competitors Motihari में क्या दे रहे हैं
17. और सबसे important — कौन-सी **problems software solve** कर सकता है जो अभी **manual** हैं

इसके बाद मैं आपको **DK Mishra Mathematics** के लिए **exact software blueprint** दूँगा—जिसमें generic “fees/attendance/student management” features भरने के बजाय यह बताऊँगा कि **इस particular coaching** के लिए कौन-सा **feature** क्यों होना चाहिए, किस **role** को दिखेगा, कौन-सा **data store** होगा, **AI** कहाँ लगेगा और **MVP** में क्या रखना है।

अगर आप चाहें तो मैं अभी इसी आधार पर **Phase-2 deep research** करके **DK Mishra** की **online presence + competitors + reviews + available public information** को भी cross-check कर देता हूँ।

2026-09-25 11:43:41 You 

bilkul deep research kro : अब मैं अगली research में specifically ये चीजें निकालना चाहूँगा:

1. **कौन-कौन सी classes पढ़ाई जाती हैं**
2. CBSE / ICSE / Bihar Board / competitive exams में से क्या target है
3. कितने प्रकार के batches हैं
4. उनकी current test methodology
5. test में कितने questions/marks/time होते हैं
6. topic → chapter → subject structure कैसे है
7. practice sets कैसे दिए जाते हैं
8. students को notes/material कैसे मिलता है
9. biometric attendance का actual workflow
10. parents को अभी कैसे information दी जाती है
11. result/rank कैसे बनाया जाता है
12. doubt solving अभी कैसे होती है
13. teachers/admin का current workflow
14. coaching की social-media presence
15. students/reviews में repeatedly कौन-सी चीजें mention होती हैं
16. competitors Motihari में क्या दे रहे हैं
17. और सबसे important — **कौन-सी problems software solve कर सकता है जो अभी manual हैं**

इसके बाद मैं आपको **DK Mishra Mathematics** के लिए exact software blueprint** दूँगा—जिसमें generic “fees/attendance/student management” features भरने के बजाय यह बताऊँगा कि **इस particular coaching के लिए कौन-सा feature क्यों होना चाहिए, किस role को दिखेगा, कौन-सा data store होगा, AI कहाँ लगेगा और MVP में क्या रखना है।**

ChatGPT gpt-5-6

हाँ। मैंने इस बार **DK Mishra Mathematics Today, Motihari** को generic coaching मानकर नहीं, बल्कि उसके नाम, location, public profiles, YouTube footprint, available listings और Motihari के आसपास के mathematics-coaching landscape को cross-check करके research किया है।

एक महत्वपूर्ण बात पहले: **DK Mishra की internal operations—जैसे exact batch count, exact test duration/marks, biometric device का workflow, parent communication का current तरीका—public web पर उपलब्ध नहीं हैं।** इसलिए जहाँ evidence नहीं मिला, वहाँ मैं उसे fact की तरह नहीं लिखूँगा। जहाँ आपके द्वारा दी हुई जानकारी और public evidence दोनों मिलते हैं, वहाँ मैं उसे clearly distinguish कर रहा हूँ।

1. सबसे पहले: DK Mishra Mathematics Today की public identity

D.K.MISHRA MATHEMATICS TODAY

Current business listing में:

- **Name:** D.K.MISHRA MATHEMATICS TODAY
- **Category:** Coaching Center
- **Location:** Chandmari, Motihari, Bihar — M.S. College/Red Bungalow/Ram Sharan Gate area
- **Public rating:** 4.8/5
- **Reviews:** 137
- **Listed phone:** +91 89360 70140
- **Listed hours:** लगभग 6 AM–8 PM, all days

ये current business listing से verified हैं।

Justdial पर इसी/संबंधित listing में address **M.S. College के right, behind the Red Bungalow, Station Road, Motihari** दिया गया है और 4.7/5 based on 16 ratings दिखता है। ([Justdial](#))

Important: Justdial के description में library, counselling, regular mock tests, parental engagement आदि कई generic claims हैं। इन्हें मैं DK Mishra की confirmed features नहीं मानूँगा, क्योंकि page का यह हिस्सा templated/generated लगता है और individual coaching द्वारा independently verified नहीं है। ([Justdial](#))

2. सबसे मजबूत discovery: उनका YouTube footprint

यह research का सबसे interesting हिस्सा है।

एक YouTube result “**Mathematics Today D.k.mishra**” नाम से मिला, creator “**D.k. mishra motihari**” है। पुराने वीडियो में:

“Limit class XI indeterminate form for algebraic functions by D.K. Mishra”

दिया गया है। ([YouTube](#))

इससे कम-से-कम यह establish होता है कि **D.K. Mishra Motihari की Mathematics Today identity का online teaching footprint है और XI-level mathematics content publish किया गया है।**

और current indexed video results में उनका content और भी स्पष्ट दिखता है।

2026 indexed content

एक indexed result में:

“pura maths chapterwise all concepts, all objective, all 2 marks, all 5 marks v.v.i questions
#12thmath”

creator:

D.k. mishra motihari

और date:

23 January 2026

दिखती है। (Salda)

एक और current result:

"integration objective class 12th 2027"

creator:

D.k. mishra motihari

date:

4 September 2026

दिखाता है। (Salda)

इससे क्या पता चलता है?

यह बहुत महत्वपूर्ण है:

DK Mishra का online academic content specifically Class 12 / Bihar Board-style Mathematics preparation की दिशा में जाता हुआ दिखाई देता है।

3. Bihar Board का evidence काफी strong है

उनके LinkedIn public profile में:

"2024 board exams special #केवल बिहार बोर्ड के छात्र छात्राओं के लिए"

का post दिखाई देता है। Profile में organization/experience के रूप में **Mathematics Today, Bihar, India** भी दिखता है। (LinkedIn)

इसलिए:

Bihar Board connection = strong public evidence

विशेष रूप से:

- Board exam preparation
- Class 12 mathematics
- Chapter-wise content
- Objective questions
- 2-mark questions
- 5-mark questions
- VVI questions

का public footprint मिलता है। (LinkedIn)

4. कौन-कौन सी classes?

Public evidence के आधार पर मैं अभी इसे इस तरह classify करूंगा:

Level	Evidence
Class XI	✔ Strong evidence
Class XII	✔ Very strong evidence
Bihar Board	✔ Strong evidence
Mathematics	✔ Strong evidence
Other classes	⚠ Publicly not sufficiently verified
CBSE	⚠ Not sufficiently verified for DK Mishra specifically
ICSE	✗ No reliable DK-specific evidence found
JEE	⚠ No reliable Motihari-DK-specific evidence found
NDA/other competitive	✗ Not established for this Motihari coaching

Class XI का evidence पुराने YouTube content से है; Class XII का evidence 2026 content से काफी stronger है। (YouTube)

इसलिए software design में अभी मैं **Class XI/XII + Bihar Board first-class citizen** रखूँगा, लेकिन बिना coaching से confirmation के CBSE/JEE को core business assumption नहीं बनाऊँगा।

5. Content structure का सबसे important evidence

आपने बताया था:

- topic-wise test
- pure subject test
- topic-wise practice sets/questions

और public content इसे काफी strongly support करता है।

उनके indexed content में:

“chapterwise all concepts → all objective → all 2 marks → all 5 marks → VVI questions”

जैसी structure दिखाई देती है। (Salda)

इससे हमें software की सबसे important hierarchy मिलती है:

text

Class
↓
Mathematics
↓
Chapter
↓
Topic / Concept
↓
Question Type
↓
Question

और question type:

text

Objective
2 Marks
5 Marks
VVI
Practice
Board Pattern

इस structure को software के database का core बनाना चाहिए।

6. Current test methodology – क्या verify हुआ?

आपने बताया है कि coaching में:

- Topic-wise tests
- Full-subject tests
- Topic-wise practice sets

होते हैं।

इसे मैं **user-provided operational information** मान रहा हूँ, web-verified claim नहीं।

Public web से **exact test pattern** नहीं मिला:

- कितने questions?
- कितने marks?
- कितने minutes?
- negative marking?
- objective/subjective ratio?
- rank कैसे calculate होता है?

- percentile?
- offline/online?
- test attempt window?

इनमें से किसी का reliable public evidence मुझे नहीं मिला ।

इसलिए इन numbers को software में अभी configurable रखना चाहिए:

text

Test Template

Name

Class

Chapter

Topic

Question Count

Total Marks

Duration

Question Types

Difficulty

Negative Marking

Attempt Rules

Solution Release

Result Release

7. लेकिन उनके content से एक important test architecture निकलता है

उनके public material में:

Objective + 2-mark + 5-mark

का distinction है । ([Salda](#))

इसलिए test engine में सिर्फ MCQ support करना गलत होगा ।

इसे support करना चाहिए:

Objective

- MCQ
- Multiple correct
- Assertion/Reason
- Fill in the blank

Subjective

- 2 marks
- 3 marks
- 5 marks
- Long answer

Special

- VVI
- Board-pattern
- Chapter test
- Full syllabus
- Revision test

8. Topic → Chapter → Subject architecture

DK Mishra के लिए मैं इसे generic LMS जैसा नहीं रखूँगा ।

Example:

text

```
Class 12
  ↓
Mathematics
  ↓
Integrals
  ↓
Indefinite Integration
  ↓
Basic Integration
  ↓
Question Types
  ├── Objective
  ├── 2 Marks
  ├── 5 Marks
  └── VVI
```

फिर:

text

```
Question
  ├── Difficulty
  ├── Concept
  └── Formula
```

यही बाद में AI का foundation बनेगा ।

9. Practice system के लिए strongest opportunity

आपने बताया है कि **topic-wise practice sets** होते हैं ।

Public content भी chapter-wise practice/question approach दिखाता है । ([Salda](#))

इसलिए software में practice को तीन levels में बनाना चाहिए:

Level 1 — Teacher-created

Teacher:

Chapter → Topic → Questions → Practice Set

Level 2 — Student-selected

Student:

Chapter → Topic → 20 Questions

Level 3 — AI-generated

Student:

"मेरे गलत questions जैसे 10 और questions दो."

AI:

Similar concept + similar difficulty.

10. Study material delivery

Publicly online video/content delivery का evidence है । ([YouTube](#))

लेकिन offline students को:

- Printed notes?
- PDF?
- WhatsApp?
- Telegram?
- App?

- Physical question bank?

इनमें से कौन-सा current workflow है, **public sources** से **verify** नहीं हुआ।

इसलिए software में सभी options support करने की क्षमता रखनी चाहिए:

text

Study Material

- |—— PDF
- |—— Images
- |—— Video
- |—— Question Sets
- |—— Solutions
- |—— Formula Sheets
- |—— Board VVI Material

11. Biometric attendance

यह आपने specifically बताया है।

Public sources से biometric device का brand/workflow verify नहीं हुआ।

इसलिए मैं इसे software architecture में इस तरह design करूँगा:

text

Biometric Device

Student ID

Attendance API

Batch

Class Session

Attendance Record

इससे सिर्फ attendance नहीं बनेगी।

हम बाद में निकाल सकते हैं:

Attendance vs Test Performance

उदाहरण:

text

Attendance: 96%
Average Score: 84%

vs

Attendance: 62%
Average Score: 57%

यह coaching के लिए genuinely useful analytics होगा ।

12. Parents को information कैसे दी जाती है?

Reliable public evidence नहीं मिला ।

इसलिए मैं WhatsApp/phone/SMS को current fact नहीं बताऊँगा ।

लेकिन software के लिए recommended parent communication layer:

text

Attendance
Test Result
Rank
Weak Topic
Fee Reminder
Important Notice
Performance Report

और सबसे useful:

Weekly Parent Report

text

This Week

Attendance	5/6
Tests	2
Average Score	78%
Practice	145 Questions
Weak Topic	Integration
Improvement	+8%

13. Result/rank methodology

Exact DK Mishra ranking formula public नहीं मिला ।

इसलिए software में multiple ranking methods configurable रखेंगे:

text

Score Rank
Accuracy Rank
Batch Rank
Chapter Rank
Improvement Rank

लेकिन मैं केवल **topper rank** पर focus नहीं करूँगा।

सबसे valuable metric होगा:

Improvement

text

Previous Test: 52%
Current Test: 71%

Improvement: +19 percentage points

इससे weaker students भी track होंगे।

14. Doubt solving

Public DK-specific source से current doubt workflow verify नहीं हुआ।

लेकिन क्योंकि उनके public content में detailed mathematical explanations/solutions का focus दिखाई देता है, software में doubt system को बहुत naturally integrate किया जा सकता है। ([Salda](#))

Proposed:

Student:

 Question Photo

↓

AI:

Question Recognition

↓

Step-by-Step Solution

↓

Student:

Still confused

Ask Teacher

Teacher:

Verified Solution

15. Social-media presence

यहाँ interesting evidence है ।

YouTube

D.k. mishra motihari / Mathematics Today

का teaching footprint मिलता है । ([YouTube](#))

LinkedIn

D.k. mishra motihari

नाम से public profile है, जिसमें **Mathematics Today** और Bihar location दिखाई देती है । ([LinkedIn](#))

Facebook / Instagram

मेरी searches में **official DK Mishra Mathematics Today account** को **reliably verify** नहीं कर पाया ।

इसलिए मैं कोई random similarly named Facebook/Instagram account को official नहीं मान रहा ।

16. Student reviews में क्या repeatedly दिखता है?

यहाँ एक limitation है ।

Google business listing में current aggregate:

4.8 / 5 – 137 reviews

है ।

लेकिन search interface ने मुझे individual review text का reliable, attributable dataset नहीं दिया । इसलिए मैं यह claim नहीं करूंगा कि:

"students repeatedly कहते हैं कि X, Y, Z"

जब तक actual review texts उपलब्ध न हों ।

यह important distinction है।

17. Motihari में competition

यहाँ picture काफी interesting है।

DK Mishra जिस **Chandmari / M.S. College area** में है, वहाँ कई mathematics/coaching institutions मौजूद हैं।

उदाहरण:

- Math Mandir Classes — 4.6/5, 222 reviews
- MATHS HUB — 4.9/5
- ANAL'S MATH CENTRE — 4.7/5, 27 reviews
- Sigma Mathematics — 4.1/5, 34 reviews
- Principle Of Mathematics — 5.0/5, 59 reviews
- Raj Mathematics Centre — 5.0/5, 10 reviews
- Pranav Mathematics, Motihari — 4.9/5
- maths adda — 5.0/5, 37 reviews

इसके अलावा Motihari में बड़े multi-subject competitors भी हैं, जैसे Physics Wallah Vidyapeeth Coaching Center Motihari, जिसके listing में 280 reviews और 4.6/5 rating दिखती है।

और Vishal JEE/NEET Classes के listing में 311 reviews और 4.9/5 है।

18. Competition में एक और interesting pattern

Motihari की दूसरी mathematics coaching की current web presence देखी।

उदाहरण के लिए **Right Concept of Mathematics** की site अपने offering को:

- Class 11
- Class 12
- JEE Main
- JEE Advanced

के लिए mathematics-only बताती है। इसकी site chapter-wise notes, formula sheets, graded practice, weekly tests, monthly assessments और full-syllabus mocks की positioning करती है। ([Right Concept of Mathematics](#))

लेकिन ध्यान दें: यह competitor की own website claims हैं; इन्हें independent outcomes के रूप में नहीं लेना चाहिए।

एक पुराने YouTube description में **N.K. Singh / Narendra Classes** को Class XI/XII, CBSE/Bihar Board, JEE Main/Advanced आदि के लिए mathematics coaching बताते हुए पाया गया। ([YouTube](#))

इससे Motihari market में एक pattern दिखता है:

Board + Competitive + Mathematics specialization

और दूसरा pattern:

Offline teaching + regular tests + study material + doubt support

इसलिए DK Mishra का software केवल "attendance app" हुआ तो competitive differentiation कम रहेगा ।

19. अब सबसे important: DK Mishra के लिए software में क्या solve होना चाहिए?

यहाँ मेरी research-based conclusion है ।

उनके model के लिए **5 core problems** सबसे important हैं:

Problem 1 — Question bank बहुत बड़ा होता जाएगा

अगर:

text

Class 12

→ Mathematics

→ 13 chapters

→ multiple topics

→ Objective

→ 2 marks

→ 5 marks

→ VVI

है, तो manually questions organize करना मुश्किल होगा ।

Solution

Structured Question Bank

हर question tagged:

text

Class

Board

Chapter

Topic

Concept

Type

Marks

Difficulty

Source

20. Problem 2 – Test के बाद सिर्फ marks पर्याप्त नहीं

Student:

42/50

जानता है।

लेकिन teacher को पता होना चाहिए:

कहाँ गलती हुई?

Software:

text

Integration	88%
Differentiation	91%
Area	52%
Application	47%

Teacher को immediately पता:

Area + Application पर remedial teaching चाहिए।

21. Problem 3 – हर student अलग है

एक student को:

Integration

की problem है।

दूसरे को:

Calculation

की।

तीसरे को:

Concept

की।

सभी को same 50 questions देना inefficient हो सकता है।

इसलिए:

Personalized Practice

text

Student

Past Tests

Wrong Questions

Weak Concepts

Personalized Set

Retest

22. Problem 4 – Teacher का बहुत समय analysis में जाता है

Teacher को manually पता करना पड़ सकता है:

- कौन absent?
- किसका score कम?
- किस topic में problem?
- किस student की performance गिर रही?
- किसे extra practice चाहिए?

Software automatically करे।

Teacher Dashboard

12 students need attention

और नीचे:

text

8 → Integration

5 → Probability

4 → Matrices

3 → Calculation errors

23. Problem 5 – Test के बाद learning खत्म नहीं होनी चाहिए

यही software का सबसे बड़ा opportunity है।

Current flow:

Test → Marks → Solution

हमारा flow:

Test → Marks → Question Analysis → Error Classification → Solution → Weak Concept → Targeted Practice → Retest → Improvement

यह बहुत ज्यादा powerful learning cycle होगा ।

24. AI को कहाँ लगाना चाहिए?

मैं AI को हर जगह लगाने के पक्ष में नहीं हूँ ।

AI #1 – Doubt Solver

 Question photo → solution

AI #2 – Hint Engine

पूरा answer देने की जगह:

"पहले कौन सा formula apply करना चाहिए?"

AI #3 – Mistake Detection

Student का solution → error identification

AI #4 – Similar Question

एक गलत question → 5 similar questions

AI #5 – Question Generator

Teacher:

Chapter 5, Integration, medium, 20 questions

AI draft बनाए ।

Teacher approve करे ।

AI #6 – Test Analysis

AI:

"Most students struggled with application of definite integration."

AI #7 – Study Plan

AI:

25. और एक बहुत बड़ा feature: "AI should know DK Mishra's teaching material"

यह software का long-term moat बन सकता है।

Teacher के:

- Notes
- Solutions
- Formula sheets
- Question bank
- Test papers
- Explanations

को approved knowledge base में रखो।

फिर student पूछे:

"Sir ke method se ye question kaise solve hoga?"

AI DK Mishra के **approved teaching material** के आधार पर explain करे।

यह generic ChatGPT से ज्यादा relevant होगा।

लेकिन इसके लिए content ownership/permission और quality controls properly handle करने होंगे।

26. मेरी research से अभी क्या CONFIRMED है?

High confidence

DK Mishra Mathematics Today – Motihari

- Mathematics-focused identity ✓
- Motihari/Chandmari location ✓
- Current business listing ✓
- 4.8/5, 137 reviews listed ✓
- Class XI content evidence ✓
- Class XII content evidence ✓
- Bihar Board-specific public content ✓
- Chapter-wise Mathematics content ✓
- Objective + 2-mark + 5-mark content ✓

- VVI question-oriented content ✓
- Active 2026 YouTube content indexed ✓
- Mathematics Today public identity ✓

(YouTube)

अभी **NOT publicly verified**

- Exact classes beyond XI/XII
- Exact batch count
- Exact batch size
- Exact test duration
- Exact test marks
- Exact test frequency
- Exact ranking algorithm
- Exact biometric hardware
- Current parent communication channel
- Current fee-management process
- Current internal teacher workflow
- Current official Instagram/Facebook account
- Exact current doubt-solving process

इनको हमें **assume नहीं करना चाहिए** ।

27. अब DK Mishra के software का सही concept

मैं इसे नाम दूँगा:

DKM MathOS

Core architecture:

और इसका central engine:

Question Intelligence Engine

हर question सिर्फ question नहीं होगा ।

text

Question

|

|—— Chapter

|—— Topic

|—— Concept

|—— Difficulty

|—— Marks

|—— Question Type

|—— Board

|—— Correct Answer

|—— Detailed Solution

|—— Hint

|—— Common Mistakes

|—— Average Time

|—— Similar Questions

यही database आगे:

Practice + Test + AI + Analytics + Student Profile

सबको power देगा ।

मेरी सबसे बड़ी recommendation

अभी coding शुरू मत करो ।

इस research के बाद अगला सबसे valuable काम होगा **DK Mishra के actual internal workflow को map करना** ।

क्योंकि public research से हमें “बाहर से coaching कैसी दिखती है” पता चल गया है; अब software को exact बनाने के लिए हमें “अंदर coaching कैसे चलती है” चाहिए।

अगर DK Mishra से आपको ये चीजें मिल सकती हैं—एक **actual test paper, practice set, result sheet/rank list, biometric attendance screenshot/export, batch timetable, student/parent communication का sample** और उनके **existing notes/question bank का sample**—तो उन materials के आधार पर हम अगला step बहुत ज्यादा accurately कर सकते हैं।

उनमें से कोई भी file/screenshot यहाँ upload कर दीजिए। मैं फिर उस actual material को analyze करके **DK Mishra MathOS का complete SRS + roles + modules + database schema + page-by-page UI + AI architecture + MVP/Phase-2 roadmap** तैयार कर दूँगा।

2026-09-25 12:07:30 You 

matalb hme ye batao ki unse hme kya kya jakari chahiye kya kya mai puchhu

 ChatGPT gpt-5-6

Bilkul. Abhi **software banana start karne se pehle DK Mishra sir/coaching se requirements collect karna sabse important step hai**. Aap unse random questions mat poochna; ek structured **Requirement Discovery Questionnaire** le kar jao.

Main aapko exact questions de raha hoon jo aap unse pooch sakti ho. Isse humein software ka almost complete blueprint mil jayega.

DK Mishra Mathematics — Requirement Questions

1. Coaching ka basic structure

Sabse pehle ye poochho:

1. Aap kaun-kaun si **classes** padhate hain?
2. Kaun-kaun se **boards/exams** target hain?
 - Bihar Board
 - CBSE
 - ICSE
 - JEE
 - Other
3. Har class mein approximately kitne students hain?

4. Total active students kitne hain?
 5. Kitne teachers hain?
 6. Kya ek hi branch hai ya future mein multiple branches ho sakti hain?
 7. Ek student ek hi batch mein hota hai ya multiple batches mein?
-

2. Batch kaise manage hota hai?

Ye bahut important hai.

Poochho:

1. Batch kaise create hota hai?
 2. Batch ka naam kaise decide hota hai?
 3. Ek batch mein maximum kitne students hote hain?
 4. Batch timings kya hote hain?
 5. Kya same class ke multiple batches hote hain?
 6. Kya students batch change kar sakte hain?
 7. Batch change hone par purana attendance/test record kaise maintain karte hain?
 8. Kya batch-wise alag test hote hain?
 9. Kya ek teacher multiple batches padhata hai?
-

3. Mathematics ka actual syllabus structure

Ye software ke liye **extremely important** hai.

Sir se poochho:

"Aap Mathematics ko software mein kis hierarchy mein organize karna chahenge?"

Example:

text

```
Class 12
↓
Mathematics
↓
Chapter
↓
Topic
↓
Sub-topic
```

↓
Concept

↓
Questions

Questions:

1. Chapter-wise structure already bana hua hai?
2. Topics ka list available hai?
3. Sub-topics maintain karte hain?
4. Board-wise syllabus different hai?
5. Kya same topic multiple chapters/batches mein use hota hai?
6. Kya syllabus complete hone ka tracking chahiye?

4. Question Bank — सबसे important section

Sir se **actual question bank** zaroor maangna.

Poochho:

1. Questions abhi kahan store hote hain?
 - Notebook
 - Word/PDF
 - Excel
 - Google Drive
 - WhatsApp
 - Printed books
 - Software
2. Approximately kitne questions hain?
3. Questions chapter-wise arranged hain?
4. Topic-wise arranged hain?
5. Difficulty level maintain karte hain?
6. Question type kya-kya hote hain?
7. Marks ke according categories hain?
8. VVI questions separately maintain karte hain?
9. Previous year questions maintain karte hain?
10. Questions ke solutions available hain?

11. Questions ko reuse karte hain?
12. Same question accidentally repeat hone ki problem hoti hai?

Aur specifically poochna:

"Agar mujhe 20 questions ka ek practice set banana ho, to aaj aapko manually kya-kya karna padta hai?"

Ye question bahut valuable hai.

5. Practice Sets

Aapne already bataya hai ki topic-wise practice sets hote hain.

Ab exact workflow samjho:

1. Practice set kaun banata hai?
 2. Teacher manually questions select karta hai?
 3. Kitne questions hote hain?
 4. Fixed questions hote hain ya random?
 5. Difficulty mix hoti hai?
 6. Practice set online hota hai ya paper-based?
 7. Student ghar se karta hai ya coaching mein?
 8. Answer submit karta hai?
 9. Teacher checking karta hai?
 10. Practice ka score maintain hota hai?
 11. Practice history maintain karte hain?
 12. Wrong questions dobara practice karvate hain?
-

6. Test System — बहुत detail में पूछना

Sir se ek **real test paper** bhi maangna.

Questions:

Test creation

1. Test kaun create karta hai?
2. Test topic-wise hota hai?
3. Chapter-wise?

4. Full syllabus?
5. Weekly/monthly?
6. Test कितनी बार होता है?

Test structure

7. Total questions?
8. Total marks?
9. Duration?
10. Objective कितने?
11. Subjective कितने?
12. 2 marks/3 marks/5 marks questions?
13. Negative marking?
14. Difficulty distribution?

Test result

15. Result कब बनता है?
16. Rank कैसे calculate होती है?
17. Same marks होने पर rank कैसे decide होती है?
18. Batch rank?
19. Overall rank?
20. Percentage?
21. Accuracy?
22. Time taken?

7. Test ke baad kya hota hai?

यह **must ask** है।

Sir se poochho:

"Student test submit karne ke baad aapka actual process kya hota hai?"

फिर पूछो:

1. Result कब मिलता है?
2. Solution कब दिया जाता है?
3. सभी questions के detailed solutions होते हैं?

4. गलत questions identify किए जाते हैं?
 5. Weak topics identify किए जाते हैं?
 6. Retest होता है?
 7. गलत questions की practice कराई जाती है?
 8. Parent को result मिलता है?
 9. Student को अपना previous test compare करने मिलता है?
-

8. Biometric Attendance

क्योंकि ये confirmed feature है, इसे deeply समझना जरूरी है।

पूछो:

1. कौन-सा biometric device इस्तेमाल हो रहा है?
2. Fingerprint है या face recognition?
3. Attendance किस software/device में currently save होती है?
4. Device का API/export available है?
5. Attendance real-time चाहिए?
6. Student आने पर automatic attendance?
7. जाते समय भी attendance?
8. Late entry track करनी है?
9. Batch automatically identify होना चाहिए?
10. Absent students की list चाहिए?
11. Parent को notification चाहिए?
12. Monthly attendance report चाहिए?
13. Attendance को test performance से compare करना है?

सबसे important:

"अभी biometric attendance का पूरा process step-by-step कैसे होता है?"

9. Student Registration

पूछो:

Student admission के समय कौन-कौन सी information लेते हैं?

Example:

text
Name
Father Name
Mother Name
DOB
Mobile
Parent Mobile
Address
Class
Board
Batch
Admission Date
Photo
School
Roll Number

फिर:

- कौन-कौन से documents लेते हैं?
- Student ID कैसे बनती है?
- Admission number है?
- Existing student data किस format में है?

10. Parents

ये भी पूछना बहुत important है ।

1. Parent से communication अभी कैसे होता है?
2. WhatsApp?
3. Phone call?
4. SMS?
5. कोई app?
6. Test result कैसे भेजते हैं?
7. Attendance कैसे बताते हैं?
8. Fee information कैसे देते हैं?
9. Parent को weekly/monthly report चाहिए?
10. Parent teacher से सीधे बात कर सकते हैं?

और ये जरूर पूछना:

"Parent को software में कौन-कौन सी information दिखनी चाहिए और कौन-सी नहीं?"

11. Student App/Portal

Student से भी पूछना चाहिए।

अगर possible हो तो **5–10 students** से बात करो।

पूछो:

1. आपको सबसे ज्यादा किस चीज में problem होती है?
 2. Practice questions कैसे मिलते हैं?
 3. Test result देखने में कोई problem?
 4. Solutions कब मिलते हैं?
 5. Doubt कैसे पूछते हो?
 6. Teacher को doubt भेजने में कितना time लगता है?
 7. Notes कहाँ से मिलते हैं?
 8. कौन-सा feature app में सबसे useful लगेगा?
 9. क्या आप daily practice करना चाहेंगे?
 10. क्या AI से doubt पूछना चाहेंगे?
 11. क्या handwritten solution upload करना useful होगा?
 12. क्या आप अपना weak chapter देखना चाहेंगे?
-

12. Teacher Workflow

हर teacher से अलग से पूछो:

Daily workflow

"Aap coaching mein ek normal din kaise manage karte hain?"

फिर:

1. Attendance कौन देखता है?
2. Batch कौन manage करता है?
3. Questions कौन prepare करता है?
4. Tests कौन बनाता है?
5. Copies कौन check करता है?
6. Marks कौन enter करता है?
7. Result कौन बनाता है?
8. Solutions कौन तैयार करता है?

9. Doubts कौन solve करता है?
 10. Parents को कौन contact करता है?
-

13. Admin Workflow

Admin से पूछो:

1. Student admission कैसे होता है?
 2. Batch allocation कैसे होता है?
 3. Attendance कौन monitor करता है?
 4. Tests कौन manage करता है?
 5. Results कैसे तैयार होते हैं?
 6. Reports कौन बनाता है?
 7. Student data कहाँ store होता है?
 8. कौन-कौन से काम सबसे ज्यादा manual हैं?
 9. कौन-सा काम बार-बार करना पड़ता है?
 10. कौन-सी report निकालने में सबसे ज्यादा समय लगता है?
-

14. Fees — अगर software में चाहिए

अगर coaching fees manage करवाना चाहती है तो पूछो:

1. Monthly fee?
 2. Quarterly?
 3. Installment?
 4. Admission fee?
 5. Discount?
 6. Scholarship?
 7. Due date?
 8. Late fee?
 9. Cash/UPI/Bank?
 10. Receipt चाहिए?
 11. Pending fee reminder चाहिए?
 12. Parent को automatic reminder चाहिए?
-

15. Study Material

पूछो:

1. Notes कैसे देते हैं?
2. PDF?
3. Printed?
4. WhatsApp?
5. Telegram?
6. Video lectures?
7. Formula sheets?
8. Previous year papers?
9. Solutions?
10. Material chapter/topic-wise organized है?

और:

"क्या आप चाहते हैं कि **student login** करके पूरा **Mathematics material** एक जगह **access** करे?"

16. AI के बारे में सीधे ये questions पूछना

यह सबसे जरूरी हिस्सा है।

Sir को features की लंबी list दिखाने के बजाय पूछो:

AI Doubt Solver

"अगर student question की photo upload करे और system step-by-step solution दे, क्या आप यह feature चाहते हैं?"

फिर:

"क्या AI को सिर्फ answer देना चाहिए या पहले hint, फिर solution देना चाहिए?"

Teacher verification

"AI के solution को student को सीधे दिखाना है या teacher approval चाहिए?"

AI Question Generator

"क्या आप topic और difficulty देकर AI से question बनवाना चाहेंगे?"

Similar questions

"Student गलत question के बाद उसी concept के 5 नए questions generate कर सके?"

Mistake detection

"Student अपना handwritten solution upload करे और system उसकी गलती identify करे?"

इनके answers बहुत valuable होंगे।

17. सबसे powerful question

Sir से यह जरूर पूछना:

"अगर आप इस software में सिर्फ 3 चीजें automate कर सकते हैं, तो कौन-सी 3 चीजें चुनेंगे?"

फिर दूसरा:

"अभी coaching में कौन-सा काम सबसे ज्यादा समय लेता है?"

फिर:

"कौन-सा काम सबसे ज्यादा गलत/भूल होने की संभावना वाला है?"

और:

"कौन-सी information आपको रोज मिलनी चाहिए लेकिन अभी आसानी से नहीं मिलती?"

ये चार questions software की actual जरूरत निकाल देंगे।

18. Future growth

पूछो:

1. Future में mobile app चाहिए?
2. Multiple branches?
3. Online classes?
4. Recorded lectures?
5. Online admission?
6. Online fee payment?
7. More teachers?
8. More classes?
9. JEE preparation?
10. Other cities?

क्योंकि architecture अभी से scalable बनाना होगा।

19. उनसे कौन-कौन से SAMPLE documents मांगने हैं?

यह सबसे important checklist है ।

अगर possible हो तो उनसे **actual/sample data का anonymized version** मांगना:

Must collect

- ☐ एक student admission form
- ☐ एक batch list
- ☐ एक timetable
- ☐ एक biometric attendance report
- ☐ एक topic-wise practice set
- ☐ एक topic-wise test
- ☐ एक full subject test
- ☐ एक test answer sheet
- ☐ एक result/rank sheet
- ☐ एक detailed solution
- ☐ question bank का sample
- ☐ syllabus/chapter list
- ☐ study material का sample
- ☐ parent को भेजा जाने वाला result/notice
- ☐ existing student record का sample

Personal data हटाकर/anonymize करके लेना बेहतर है ।

20. मैं आपको एक ready-made meeting sequence देता हूँ

Sir के साथ meeting में इसी order में चलना:

Part A — Coaching

10 min

आप कौन-कौन सी classes और boards पढ़ाते हैं?

Part B — Current Process

15 min

Student admission से लेकर final result तक पूरा process बताइए ।

Part C — Mathematics

15 min

Chapter → Topic → Practice → Test कैसे manage करते हैं?

Part D — Problems

15 min

अभी सबसे ज्यादा manual और time-consuming काम कौन से हैं?

Part E — Students

10 min

Student और parent को software में क्या दिखना चाहिए?

Part F — AI

10 min

AI से कौन-कौन से काम करवाना useful होगा?

Part G — Future

5 min

अगले 2-3 साल में coaching को कहाँ ले जाना चाहते हैं?

★ और अंत में उनसे यह एक सवाल जरूर पूछना

"Agar main aapki coaching ka software bana raha/rahi hoon, to aap chahenge ki software banne ke baad aapko kaunsa kaam bilkul manually na karna pade?"

इसका answer शायद पूरे project की सबसे valuable requirement देगा।

आपके लिए सबसे आसान तरीका

आपको **40 questions** एक साथ लेकर जाने की जरूरत नहीं है। आप sir से meeting/WhatsApp पर पहले **20 core questions** पूछो और साथ में actual documents/screenshots collect करो।

अगर आप चाहें, मैं अगला step आपके लिए एक **professional “DK Mishra Mathematics Software Requirement Form”** बना सकता हूँ — जिसे आप सीधे Sir को WhatsApp पर भेज सकती हैं या print करके interview में भर सकती हैं, जिसमें **checkbox + multiple choice + short answer + document upload checklist** होगी।

Bilkul ❤️ Main ise aise structure kar raha hoon ki aap **directly DK Mishra Sir/management ko WhatsApp par bhej sakti hain ya meeting mein fill karwa sakti hain**. Questions ka focus software requirements nikalne par rahega, technical language minimum rakhi hai.

Document

DK Mishra Mathematics – Software Requirement Discovery Form

DK MISHRA MATHEMATICS

Software Requirement Discovery Form

Purpose: DK Mishra Mathematics Coaching ke liye ek customized digital platform/software design karne ke liye coaching ke current workflow, requirements, problems aur future needs ko samajhna.

Date: _____

Filled By: _____

Designation: _____

SECTION 1 – COACHING PROFILE

1. Aapki coaching mein kaun-kaun si classes padhayi jaati hain?

- ☐ Class 9
- ☐ Class 10
- ☐ Class 11
- ☐ Class 12
- ☐ Other: _____

2. Aap kaun-kaun se boards/exams target karte hain?

- ☐ Bihar Board
- ☐ CBSE
- ☐ ICSE
- ☐ JEE Main
- ☐ JEE Advanced
- ☐ Other: _____

3. Approximately kitne active students hain?

Total Students: _____

4. Approximately kitne teachers/faculty hain?

Teachers: _____

5. Kya future mein multiple branches/openings ka plan hai?

- ☐ Yes
- ☐ No
- ☐ Maybe

Details:

SECTION 2 – BATCH MANAGEMENT

6. Coaching mein kitne types ke batches hain?

Example: Class 12 Morning, Class 12 Evening, Board Batch, JEE Batch etc.

7. Ek batch mein average kitne students hote hain?

8. Batch kaise create/assign kiya jata hai?

9. Kya ek student batch change kar sakta hai?

- ☐ Yes
- ☐ No

10. Kya ek student ek se zyada batch/class attend kar sakta hai?

- ☐ Yes
- ☐ No

11. Batch ka timetable kaise manage hota hai?

- ☐ Notebook/Register
- ☐ Excel
- ☐ WhatsApp
- ☐ Google Calendar
- ☐ Other: _____

SECTION 3 – STUDENT ADMISSION

12. Student admission ke time kaun-kaun si information collect ki jaati hai?

- ☐ Student Name
- ☐ Father's Name
- ☐ Mother's Name
- ☐ Date of Birth
- ☐ Student Mobile
- ☐ Parent Mobile
- ☐ Address
- ☐ School Name
- ☐ Class
- ☐ Board
- ☐ Photo
- ☐ Previous Marks
- ☐ Other: _____

13. Kya student ko unique Admission ID/Roll Number diya jata hai?

- ☐ Yes
- ☐ No

14. Kya admission ke documents digitally store karne ki requirement hai?

- ☐ Yes
 - ☐ No
-

SECTION 4 – MATHEMATICS SYLLABUS STRUCTURE

15. Mathematics ko aap kis structure mein manage karna chahenge?

- ☐ Class → Chapter → Topic
 - ☐ Class → Chapter → Topic → Sub-topic
 - ☐ Class → Chapter → Topic → Concept
 - ☐ Other: _____
-

16. Kya har topic ke liye separate question/practice/test maintain karna hai?

- ☐ Yes
- ☐ No

17. Kya different boards ke liye same topic ka content alag maintain karna hai?

- ☐ Yes
 - ☐ No
 - ☐ Not Applicable
-

SECTION 5 – QUESTION BANK

18. Abhi questions kahan maintain kiye jaate hain?

- ☐ Notebook
- ☐ Printed Books
- ☐ Word/PDF
- ☐ Excel
- ☐ Google Drive
- ☐ WhatsApp
- ☐ Other: _____

19. Approximately kitne questions ka question bank hai?

20. Questions ko kin categories mein divide kiya jata hai?

- ☐ Objective
- ☐ 2 Marks
- ☐ 3 Marks
- ☐ 4 Marks
- ☐ 5 Marks
- ☐ VVI
- ☐ Previous Year Questions
- ☐ Board Pattern
- ☐ Other: _____

21. Kya har question ke saath detailed solution available hai?

- ☐ Yes
- ☐ No
- ☐ Some Questions

22. Kya questions ko difficulty ke according classify karna chahenge?

- ☐ Easy
 - ☐ Medium
 - ☐ Hard
 - ☐ Very Hard
-

SECTION 6 – PRACTICE SETS

23. Practice sets kaun banata hai?

- ☐ Teacher
- ☐ Admin

- ☐ Both

24. Practice set kaise prepare hota hai?

25. Practice sets kis level par hote hain?

- ☐ Topic-wise
- ☐ Chapter-wise
- ☐ Full Subject
- ☐ Mixed

26. Ek practice set mein average kitne questions hote hain?

27. Kya student ke previous mistakes ke basis par personalized practice set banana useful hoga?

- ☐ Yes
- ☐ No

28. Kya wrong questions ko automatically dobara practice karwana chahenge?

- ☐ Yes
 - ☐ No
-

SECTION 7 – TEST SYSTEM

29. Kaun-kaun se tests conduct hote hain?

- ☐ Topic Test
- ☐ Chapter Test
- ☐ Unit Test
- ☐ Full Subject Test
- ☐ Weekly Test
- ☐ Monthly Test
- ☐ Revision Test
- ☐ Mock Test
- ☐ Board Pattern Test
- ☐ Other: _____

30. Test ka average duration kitna hota hai?

31. Test ke total marks kitne hote hain?

32. Questions ka सामान्य pattern kya hota hai?

33. Kya negative marking hoti hai?

- ☐ Yes
- ☐ No

34. Test online hota hai ya offline?

- ☐ Online
- ☐ Offline
- ☐ Both

35. Test questions ka selection kaise hota hai?

- ☐ Manually
 - ☐ Fixed Question Paper
 - ☐ Random Question Selection
 - ☐ Other: _____
-

SECTION 8 – TEST RESULT & RANKING

36. Test submit/check hone ke baad result mein kya-kya dikhna chahiye?

- ☐ Marks
- ☐ Percentage
- ☐ Rank
- ☐ Accuracy
- ☐ Correct Questions
- ☐ Wrong Questions
- ☐ Skipped Questions
- ☐ Time Taken
- ☐ Topic-wise Performance
- ☐ Chapter-wise Performance

37. Rank kaise calculate ki jaati hai?

38. Kya batch-wise rank chahiye?

- ☐ Yes
- ☐ No

39. Kya overall coaching rank chahiye?

☐ Yes

☐ No

40. Kya student ki previous tests ke saath performance comparison chahiye?

☐ Yes

☐ No

SECTION 9 – TEST SOLUTIONS

41. Test complete hone ke baad solution kab available hota hai?

☐ Immediately

☐ Same Day

☐ Next Day

☐ Other: _____

42. Solution kis format mein chahiye?

☐ Final Answer

☐ Step-by-Step Solution

☐ Video Solution

☐ PDF Solution

☐ All

43. Kya wrong question ke saath "Why this answer is wrong?" explanation useful hoga?

☐ Yes

☐ No

44. Kya wrong question se automatically similar questions generate karna useful hoga?

☐ Yes

☐ No

SECTION 10 – BIOMETRIC ATTENDANCE

45. Current biometric system kaun-sa hai?

Device/Brand: _____

46. Biometric type:

☐ Fingerprint

☐ Face Recognition

☐ Other: _____

47. Attendance ka current process kya hai?

48. Attendance data kahan store hota hai?

49. Kya biometric device se data automatically software mein aana chahiye?

- ☐ Yes
- ☐ No

50. Attendance mein kya-kya track karna hai?

- ☐ Present
- ☐ Absent
- ☐ Late
- ☐ Entry Time
- ☐ Exit Time
- ☐ Attendance Percentage
- ☐ Attendance Streak

51. Kya absent student ke parent ko automatic notification chahiye?

- ☐ Yes
 - ☐ No
-

SECTION 11 – STUDENT PORTAL

52. Student login ke baad kya dekh sake?

- ☐ Dashboard
- ☐ Profile
- ☐ Batch
- ☐ Attendance
- ☐ Practice
- ☐ Tests
- ☐ Results
- ☐ Solutions
- ☐ Study Material
- ☐ Doubts
- ☐ Performance Analytics
- ☐ Notices

53. Kya student apna weak topic dekh sake?

☐ Yes

☐ No

54. Kya student apni previous performance compare kar sake?

☐ Yes

☐ No

SECTION 12 – AI FEATURES

55. Kya student Mathematics question ki photo upload karke AI se solution le sake?

☐ Yes

☐ No

56. AI solution ka format kya hona chahiye?

☐ Hint Only

☐ Step-by-Step Solution

☐ Concept Explanation

☐ Final Answer

☐ All Options

57. Kya student apna handwritten solution upload karke mistake identify karwa sake?

☐ Yes

☐ No

58. Kya AI wrong question ke similar questions generate kare?

☐ Yes

☐ No

59. Kya AI topic + difficulty ke basis par practice questions generate kare?

☐ Yes

☐ No

60. Kya AI test result analyse karke weak topics identify kare?

☐ Yes

☐ No

61. Kya AI student ke liye personalized study/revision plan suggest kare?

☐ Yes

☐ No

62. Kya AI ko DK Mishra ke approved notes/question bank/solutions ke basis par answer dena chahiye?

- ☐ Yes
 - ☐ No
 - ☐ Discuss Later
-

SECTION 13 – TEACHER PANEL

63. Teacher dashboard mein kya-kya hona chahiye?

- ☐ My Batches
- ☐ Students
- ☐ Attendance
- ☐ Question Bank
- ☐ Practice Sets
- ☐ Tests
- ☐ Results
- ☐ Doubts
- ☐ Study Material
- ☐ Student Performance
- ☐ Weak Topics

64. Teacher ko automatically kaun-si information milni chahiye?

65. Kya teacher ko alert chahiye jab kisi student ki performance continuously decrease ho?

- ☐ Yes
- ☐ No

66. Kya teacher ko class-level weak topics dikhne chahiye?

- ☐ Yes
- ☐ No

Example:

"Class ke 65% students ko Integration ke Application questions mein difficulty hai."

SECTION 14 – PARENT PANEL

67. Parent ko kya information dikhni chahiye?

- ☐ Attendance
- ☐ Test Marks

- ☐ Rank
- ☐ Performance
- ☐ Weak Topics
- ☐ Practice Activity
- ☐ Study Material
- ☐ Notices
- ☐ Fee Information
- ☐ Teacher Remarks

68. Parent ko notifications kaise chahiye?

- ☐ App
- ☐ WhatsApp
- ☐ SMS
- ☐ Email
- ☐ Phone Call

69. Kya weekly/monthly student performance report automatically generate honi chahiye?

- ☐ Yes
 - ☐ No
-

SECTION 15 – DOUBT SOLVING

70. Student currently doubt kaise poochte hain?

- ☐ Classroom
- ☐ WhatsApp
- ☐ Phone
- ☐ Teacher Personally
- ☐ Other: _____

71. Kya software mein "Ask Teacher" option chahiye?

- ☐ Yes
- ☐ No

72. Teacher ko pending doubts ka dashboard chahiye?

- ☐ Yes
- ☐ No

73. Kya AI ke baad unresolved doubt teacher ko automatically forward hona chahiye?

- ☐ Yes
 - ☐ No
-

SECTION 16 – STUDY MATERIAL

74. Kaun-kaun sa material students ko provide kiya jata hai?

- ☐ Notes
- ☐ PDF
- ☐ Practice Sets
- ☐ Question Bank
- ☐ Formula Sheets
- ☐ Previous Year Papers
- ☐ Video Lectures
- ☐ Solutions
- ☐ Other: _____

75. Kya material chapter/topic-wise organize hona chahiye?

- ☐ Yes
 - ☐ No
-

SECTION 17 – PARENT & STUDENT COMMUNICATION

76. Current communication channels:

- ☐ WhatsApp
- ☐ Phone
- ☐ SMS
- ☐ Telegram
- ☐ App
- ☐ Other: _____

77. Software se kaun-si notifications automatically bhejni chahiye?

- ☐ Attendance
 - ☐ Test Result
 - ☐ Test Reminder
 - ☐ Fee Reminder
 - ☐ New Study Material
 - ☐ Important Notice
 - ☐ Parent Report
 - ☐ Other: _____
-

SECTION 18 – REPORTS & ANALYTICS

78. Admin ko kaun-si reports chahiye?

- ☐ Total Students
- ☐ Batch-wise Students
- ☐ Daily Attendance
- ☐ Monthly Attendance
- ☐ Test Results
- ☐ Rank List
- ☐ Topic Performance
- ☐ Chapter Performance
- ☐ Weak Students
- ☐ Improvement Report
- ☐ Practice Activity
- ☐ Other: _____

79. Teacher ke liye sabse important report kaunsi hogi?

80. Parent ke liye sabse important report kaunsi hogi?

SECTION 19 – CURRENT PROBLEMS

81. Abhi coaching mein sabse time-consuming kaam kaunsa hai?

82. Kaun-sa kaam baar-baar manually karna padta hai?

83. Kis process mein errors hone ki possibility sabse zyada hai?

84. Kaunsi information aapko chahiye hoti hai lekin currently easily available nahi hoti?

85. Agar software sirf 3 kaam completely automate kare, to woh 3 kaam kya hone chahiye?

1. _____

2. _____

3. _____

SECTION 20 – FUTURE REQUIREMENTS

86. Future mein kya add karna chahenge?

- ☐ Mobile App
 - ☐ Online Classes
 - ☐ Recorded Lectures
 - ☐ Online Admission
 - ☐ Online Fee Payment
 - ☐ Multiple Branches
 - ☐ JEE Preparation
 - ☐ AI Tutor
 - ☐ Online Tests
 - ☐ Parent App
 - ☐ Other: _____
-

SECTION 21 – MOST IMPORTANT QUESTION

87. Software banne ke baad aap kaunsa kaam bilkul manually nahi karna chahenge?

88. Aapke according software ki sabse important 5 features kya honi chahiye?

1. _____
 2. _____
 3. _____
 4. _____
 5. _____
-

SECTION 22 – SAMPLE MATERIAL CHECKLIST

Please provide sample/anonymized copies wherever possible:

- ☐ Student Admission Form
- ☐ Student List
- ☐ Batch List
- ☐ Timetable
- ☐ Biometric Attendance Report
- ☐ Mathematics Syllabus

- ☐ Chapter/Topic List
- ☐ Question Bank Sample
- ☐ Practice Set Sample
- ☐ Topic Test
- ☐ Full Subject Test
- ☐ Student Answer Sheet
- ☐ Test Result
- ☐ Rank List
- ☐ Test Solutions
- ☐ Study Material/Notes
- ☐ Parent Communication Sample
- ☐ Existing Reports
- ☐ Any Existing Excel/Software Data

FINAL REQUIREMENT

Coaching Management ki sabse badi current problem:

Students ki sabse badi problem:

Teachers ki sabse badi problem:

Parents ki sabse badi problem:

Software se expected primary outcome:

Management Notes

Additional requirements / suggestions:

Authorized Person: _____

Signature: _____

Date: _____

Ek practical suggestion: is form ko ek hi baar mein पूरा भरवाने की बजाय **Sir/management ke saath 30–45 minute ki meeting** mein sections 1–21 discuss karo. Saath mein actual **test paper + result sheet + biometric report + practice set + question bank sample** le aao. In 5 documents se software ki actual requirements kaafi accurately reconstruct ho jayengi.

Aap unse ye form fill karwa kar mujhe wapas bhej dena—main uske basis par **DK Mishra MathOS ka complete SRS, user roles, modules, database entities, AI architecture aur exact MVP roadmap** bana dunga.

2026-09-25 12:25:15 You 

ye ek LMS hi n bolenge

 ChatGPT gpt-5-6

Haan, **broadly ise LMS (Learning Management System) kaha ja sakta hai**, lekin DK Mishra ke case mein sirf **LMS** bolna thoda incomplete hoga.

Aap jo system bana rahe ho, woh actually:

AI-Powered Mathematics Coaching Management & Learning Platform

ya short mein:

Mathematics LMS + Coaching ERP

hoga.

Difference samjho:

Feature	LMS	DK Mishra System
Study Material	✓	✓
Courses/Chapters	✓	✓
Practice	✓	✓
Online Tests	✓	✓

Feature	LMS	DK Mishra System
Results	✓	✓
Student Progress	✓	✓
AI Doubt Solver	Sometimes	✓
AI Maths Solution	Sometimes	✓
Biometric Attendance	Usually ✗	✓
Batch Management	Basic	✓
Parent Portal	Sometimes	✓
Teacher Dashboard	✓	✓
Question Bank	✓	✓
Topic-level Analytics	Sometimes	✓
Weak-topic detection	Advanced LMS	✓
Personalized Practice	Advanced LMS	✓
Coaching Operations	Usually limited	✓
Attendance → Performance Analytics	Usually ✗	✓

इसलिए **architecture** को **3 layers** में सोचो:

सबसे सही **terminology**

अगर Sir से बात कर रही हो, तो मैं कहूँगा:

"Hum DK Mishra Mathematics ke liye ek customized LMS + Coaching Management System develop karna chahte hain, jisme AI-based Mathematics learning aur assessment features bhi honge."

और project/document में नाम रख सकते हो:

DKM MathOS – AI-Powered Mathematics Learning & Coaching Management System

इससे यह clear रहेगा कि यह सिर्फ **online course/LMS** नहीं है; यह coaching की पूरी **academic operation + student learning system** है।

2026-09-25 12:26:34 You 

Pasted markdown(20260925-065630).md
13.4 KB

eska ek tick document file bna do no remove my content :

ChatGPT gpt-5-6

Bilkul. Maine aapke diye hue **poore content ko remove kiye bina** properly formatted **DOCX document** bana diya hai.

Download: [DK Mishra Mathematics – Software Requirement Discovery Form](#)

2026-09-25 12:33:09 You 

isme tick mark form kaise banayenge q ki ye tick mark nhi ho rha h

ChatGPT gpt-5-6

Haan, exactly. Abhi jo document bana hai usme ☐ **sirf checkbox ka symbol** hai, actual Word checkbox control nahi hai. Isliye uspar click karke tick nahi ho raha.

Agar aap chahte ho ki Sir document open karke **directly checkbox par click karein aur ✓ tick/untick ho**, to humein **Microsoft Word ke actual interactive checkbox content controls** use karne honge.

Main document ko is format mein bana sakta hoon:

Example:

1. Aapki coaching mein kaun-kaun si classes padhayi jaati hain?

- ☐ Class 9
- ☐ Class 10
- ☐ Class 11
- ☐ Class 12
- ☐ Other: _____

Har ☐ **clickable** hoga. Word mein click karne par:

☐ → ☒

ho jayega.

Yes/No questions

Kya future mein multiple branches/openings ka plan hai?

- ☐ Yes ☐ No ☐ Maybe

Ye bhi clickable होंगे।

Iske alawa main ye bhi kar sakta hoon:

-  Actual clickable checkboxes
-  Text-answer fields
-  Date field
-  Filled By field
-  Signature ke liye space
- Clean professional formatting
- Section headings
- Page numbers
- Print karne par bhi proper form layout

Aapka **original 88-question content same rahega**, main questions/content remove nahi karunga.

Agar aap chaho to main **isi DOCX ko actual clickable checkbox form mein convert karke abhi naya file bana deta hoon.**

2026-09-25 12:34:07

You

ha to bna do

Done 👍 मैंने **actual clickable Word checkboxes** वाला नया DOCX बना दिया है। आपका पूरा content रखा गया है; checkbox symbols को interactive Word form checkboxes में बदल दिया है।

Download — DK Mishra Mathematics Clickable Requirement Form

Note: इसे **Microsoft Word desktop** में खोलकर checkbox पर click करें। वहाँ checkbox tick/untick होना चाहिए।

2026-09-25 12:36:38 You 

av v click nhi ho pa rhi h

Haan, pichli file mein actual clickable control properly embed nahi hua tha. Maine ab **Word ke modern interactive checkbox content controls** ke saath ek nayi file banayi hai.

✅ **New file**

Download — DK Mishra Mathematics Interactive Clickable Checkbox Form

Isme ☐ wale options **actual Word checkbox controls** hain, sirf symbols nahi.

Important: File ko **Microsoft Word desktop app** mein open karke test karein. Word Online/Google Docs mein interactive Word controls ka behavior different ho sakta hai.

Agar isme bhi click nahi hota, to main next version **proper fillable PDF form** mein bana dunga, jisme checkbox par click karna reliably work karega.

2026-09-25 12:40:36 You 

av v clickable nhi ho rha

Haan, samajh gaya 👍 **Word mein actual clickable checkbox abhi bhi work nahi kar raha.** Word ke checkbox controls version/settings ke hisaab se unreliable ho sakte hain.

Is case mein **sabse reliable solution Fillable PDF** hai — usmein actual clickable checkbox fields honge:

- ☒ Checkbox par click karke select/unselect
- ☐ Multiple-choice questions ke liye multiple checkboxes
- Text fields bhi fill kiye ja sakte hain
- Laptop/PC par Adobe Reader/browser mein kaam karega
- Aapka **poora 88-question content same rahega, kuch remove nahi karunga**
- Form ko print karke manually bhi fill kiya ja sakta hai

Agar aap chaho to main abhi isi **DK Mishra Mathematics Software Requirement Form** ko **proper interactive fillable PDF** mein convert kar deta hoon.

2026-09-25 12:40:56 You 

yes

 ChatGPT gpt-5-6

Ho gaya ❤️ Maine **actual interactive/clickable PDF form** bana diya hai.

291 real clickable checkboxes hain — checkbox par click karke select/unselect kar sakte ho, aur completed form save bhi kar sakte ho.

👉 [Download DK Mishra Mathematics Fillable Requirement Form \(PDF\)](#)

Best testing: PDF ko Adobe Acrobat Reader ya Chrome/Edge mein open karke kisi checkbox par click karke dekho.

2026-09-25 12:45:06 You 

clickable to h lekin likhne ka option nhi

 ChatGPT gpt-5-6

Bilkul 👍 Ab maine **writing/type karne ka option bhi add kar diya hai**.

Is naye PDF mein:

- ☒ **291 clickable checkboxes**
- 🖋️ **18 writable text fields**
- Directly PDF ke andar type kar sakte ho
- Checkbox select/unselect kar sakte ho
- Form fill karke **Save** kar sakte ho

👉 **Download Fully Fillable DK Mishra Mathematics Requirement Form**

Note: Agar kisi question ke neeche text box chhota lage, main iska **large writing-area version** bhi bana sakta hoon jisme har question ke neeche proper 2–5 line ka space hoga.

2026-09-25 12:56:34 You 

play store pe inka ek app v h mathematics today ke name se

Haan, **aapki screenshot se ye clear hai ki “Mathematics Today” naam se Play Store par ek app already listed hai.** Maine bhi Play Store listing verify ki hai. ([Google Play](#))

Jo app aapne screenshot mein dikhaya hai

- **App name:** Mathematics Today
- **Developer shown:** Education Thanos Media
- **Downloads:** 1K+
- **Updated:** 23 July 2026
- **App description:** interactive lessons, step-by-step problem solving, quizzes aur tailored learning paths
- **App support:** support@classplus.co
- **Developer:** BUNCH MICROTECHNOLOGIES PRIVATE LIMITED ([Google Play](#))

Aur ek important point: public LinkedIn profile mein **D.k. mishra motihari** ka experience bhi “Mathematics Today” ke naam se listed hai. ([LinkedIn](#))

Iska DK Mishra project ke liye kya matlab hai?

Ye **bahut important discovery** hai. Agar ye wahi DK Mishra coaching ka existing app hai, to humein naya system **zero se generic LMS ke roop mein design nahi karna chahiye.**

Pehle humein existing **Mathematics Today app ka complete feature audit** karna chahiye:

Area	Existing app	New DK Mishra system
Student login	Verify	Required
Video/classes	Verify	Required
Study material	Verify	Required
Tests	Verify	Required
Practice sets	Verify	Required
Results/rank	Verify	Required
Attendance	Verify	Biometric integration
Question bank	Verify	Structured Maths QB
AI doubt solver	Verify	AI-powered
Mistake book	Verify	Required

Area	Existing app	New DK Mishra system
Weak-topic analysis	Verify	Required
Personalized practice	Verify	Required
Parent dashboard	Verify	Required
Teacher dashboard	Verify	Required
Admin/ERP	Verify	Required

Meri recommendation abhi ye hai ki hum development start karne se pehle existing Mathematics Today app ko reverse-engineer/audit karein—screenshots, modules, login flow, tests, courses, student features, teacher/admin capabilities, etc. Phir hum decide karenge ki **existing app ko extend/customize karna hai ya completely custom platform banana hai.**

Aap agar **is Mathematics Today app ko install karke uske andar ke screenshots/screens ko yahan bhejte ho**, main ek-ek screen ko analyse karke **Existing App vs DK Mishra New System ka complete feature-gap document** bana dunga.

2026-09-25 22:20:04 You 

pahle mujhe ye samjhao ki inke pass to sub h domain hosting ye sb
jb application inka play store pe h to iska pura setup process
samjhao na mujhe or inse ye sb ke bare me kya jankari leni h mujhe
ye sb v

 ChatGPT gpt-5-6

Haan, ab picture kaafi clear ho rahi hai. **Aapko DK Mishra se sirf “app ka login” nahi lena hai; aapko poora digital infrastructure samajhna hai.**

Sabse important discovery ye hai ki screenshot wala **Mathematics Today app likely Classplus ecosystem par running branded/white-label app hai.** Google Play listing mein app ka developer-facing information **BUNCH Microtechnologies Pvt. Ltd.** aur support email `support@classplus.co` diya hua hai. ([Google Play](#)) Classplus officially branded Android app, website, admin portal, courses, tests, live classes, storage etc. provide karta hai. ([Classplus](#))

Isliye pehle architecture samjho.

1. DK Mishra ka existing setup roughly kaise ho sakta hai?

Likely structure kuch is tarah hai:

Important: Public sources confirm the app is listed under Bunch Microtechnologies and uses Classplus support, and Classplus advertises this exact model of branded app + website + admin portal. But we cannot establish from public information alone exactly which Classplus plan DK Mishra has, which domain they own, or where their individual content/data is hosted. ([Google Play](#))

2. Sabse pehle "domain" aur "app" ka difference samjho

Bahut log yahan confuse hote hain.

Domain

Example:

Ye website ka address hai.

Website hosting

Website ki files/server jahan run hoti hain.

text

```
Domain
  ↓
DNS
  ↓
Hosting/Server
  ↓
Website
```

Android App

App alag entity hai:

text

```
Mathematics Today
  ↓
Android APK/AAB
  ↓
Google Play Store
```

Aur app ke andar data usually backend APIs se aata hai:

text

```
Android App
  ↓
HTTPS API
  ↓
Backend
  ↓
Database
```

Isliye **Play Store** par app hona automatically ye prove nahi karta ki DK Mishra ke paas apna **VPS/server/domain/database** hai.

Agar Classplus use ho raha hai, technology infrastructure ka substantial portion Classplus ke platform par ho sakta hai. Classplus khud kehta hai ki branded app aur website ke saath technical infrastructure handle kiya jata hai. ([Classplus](#))

3. Existing Mathematics Today app ka actual setup humein kya pata hai?

Abhi public evidence se:

App name:

Mathematics Today

Play Store developer information:

BUNCH MICROTECHNOLOGIES PRIVATE LIMITED

Support:

support@classplus.co

Developer contact:

psupdates@classplus.co

Developer address:

Noida, Uttar Pradesh

Package ID:

text

co.thanos.jhkto

Google Play listing ye information publicly show karti hai. ([Google Play](#))

Aur Classplus ke official platform page par clearly:

- Own branded app
- Own branded website
- Admin portal
- Recorded courses
- Live classes
- Student enrolments
- Storage

jaise components listed hain. ([Classplus](#))

4. Ab DK Mishra se exactly kya-kya information leni hai?

Yahi **sabse important part** hai.

Main isko 10 categories mein divide karunga.

A. APP OWNERSHIP

DK Mishra se ye questions poochho:

1. App kis platform/company se banwaya gaya?

Exact answer chahiye:

text

Classplus
Custom developer
Another LMS
Other

2. Classplus account kis naam/email/mobile par hai?

Password mat maangna.

Sirf:

text

Registered email:
Registered mobile:
Account owner:

3. Kya Mathematics Today app completely white-label hai?

4. Agar Classplus subscription band ho jaye to app ka kya hoga?

Ye **bahut important question** hai.

5. App ka actual owner kaun hai?

text

DK Mishra
Classplus
Developer
Other

5. Google Play Console ki information

Ye especially important hai.

Unse poochho:

Google Play Console

- Developer account kis naam par hai?
- Account owner ka email?
- Organization/personal account?
- App kis Play Console account mein published hai?
- DK Mishra ke paas Play Console access hai?
- Ya Classplus ke paas?
- DK Mishra ke paas admin access hai?
- App transfer possible hai?
- App signing key kis ke control mein hai?
- Package name kya hai?

Existing app ka package ID public listing mein:

text

co.thanos.jhkto

dikh raha hai. ([Google Play](#))

Password nahi lena.

Access ownership verify karna hai.

6. Domain & Website

Ab domain ka part.

DK Mishra se bolo:

Website

text

Website URL:

Example:

text

https://example.com

Domain registrar

Poocho:

Domain kis company se purchase kiya gaya hai?

Examples:

text

GoDaddy
Hostinger
Namecheap
BigRock
Cloudflare
Other

Domain owner

Poocho:

Domain registration kis person/company ke naam par hai?

Account access

text

Registrar:
Registered email:
Registered mobile:

Password nahi.

7. DNS ki information

Agar future mein custom system banana hai, DNS bahut important hai.

Poocho:

DNS kis jagah manage hota hai?

Examples:

text

Cloudflare
GoDaddy
Hostinger

Namecheap
Other

Aur:

text

Who controls DNS?

8. Hosting / Server

Ye specifically poochhna.

Website/server kis platform par hosted hai?

Possible answers:

text

Classplus
AWS
Google Cloud
Azure
DigitalOcean
Hostinger
Vercel
Netlify
Railway
Other

Aur:

Kya DK Mishra ke paas hosting account ka ownership/access hai?

Important:

Agar answer aaye:

"Sab Classplus manage karta hai"

to samajhna:

unke paas traditional VPS/database hosting setup shayad directly nahi hai.

9. Database

Ye sabse important technical information hai.

Poocho:

Student data kis system/database mein store hota hai?

Example:

text

Classplus database
MySQL
PostgreSQL
MongoDB
Firebase
Other
Unknown

But remember:

Unse database password ya raw student database maangne ki zarurat nahi hai.

Aapko architecture samajhna hai.

Poocho:

Data ownership

Student data ka owner kaun hai?

Data export

Kya student data export kiya ja sakta hai?

Example:

text

Excel
CSV
API
Database backup
No export

Content export

Videos/PDFs/tests ko export/migrate kar sakte hain?

Ye future custom software ke liye **extremely important** hai.

10. Videos kaha hosted hain?

Ye bhi zaroor poochna.

Example:

text

Classplus
YouTube
Vimeo
AWS S3
Cloudflare
Other

Aur:

Kya videos download/export/migrate kiye ja sakte hain?

11. Study Material

Poocho:

text

PDF kaha uploaded hain?
Notes kaha stored hain?
Question papers kaha stored hain?
Solutions kaha stored hain?

Aur:

Kya saara existing study material export ho sakta hai?

12. Test System

Since hum DK Mishra ke custom Mathematics platform bana rahe hain, ye bahut important hai.

Poocho:

Existing app mein:

- Online test hai?
- Offline test management hai?
- Topic test hai?
- Chapter test hai?
- Full Mathematics test hai?

- Automatic checking hai?
- Rank generate hoti hai?
- Percentile?
- Solutions?
- Answer key?
- Question bank?
- Previous tests?
- Test analytics?

Aur:

Existing test data export kiya ja sakta hai?

13. Student Data

Ye list zaroor collect karna:

text

Student Name
 Father/Mother Name
 Mobile
 Email
 Class
 Board
 Batch
 Admission Date
 Course
 Fees
 Attendance
 Test Results
 Rank
 Performance
 Study Material Access

Phir poochho:

Inmein se kaunsa data Classplus mein available hai?

Aur:

Is data ka export possible hai?

14. Attendance

Aapne already bataya hai ki DK Mishra **biometric attendance** use karta hai.

To specifically poochho:

text

Biometric device company:

Device model:

Attendance software:

Database/software:

API available?

Export format:

Excel?

CSV?

API?

Aur:

Kya biometric attendance existing Mathematics Today/Classplus system se connected hai?

Agar connected hai:

text

Biometric

↓

Attendance Software

↓

API

↓

Classplus

Agar connected nahi hai:

text

Biometric

↓

Separate System

Ye distinction bahut important hai.

15. Payment System

Poocho:

Online payment gateway:

text

Razorpay
Cashfree
PayU
PhonePe
UPI
Classplus payment
Other

Aur:

- Account kis naam par?
- Settlement kis bank account mein?
- Payment data export?
- Refund system?
- Coupon?
- Installment?
- Fees management?

Bank password/OTP kabhi nahi lena.

16. Notifications

Poocho:

Existing system mein kya use hota hai:

text

Push Notification
SMS
WhatsApp
Email
In-app notification

Aur:

Kis service/provider se?

17. Admin Panel

Sabse important demo yahi hai.

DK Mishra se bolo:

Screenshots/video le lo:

Dashboard

Students

Batches

Courses

Videos

PDFs

Tests

Results

Attendance

Fees

Notifications

Reports

Settings

User management

Teacher management

18. Existing app ka complete technical audit

Aapko DK Mishra se ye **15 चीजें** specifically leni chahiye:

text

1. App Play Store URL
2. App package name
3. Classplus account details
4. Admin panel URL
5. Admin login ownership
6. Website URL
7. Domain registrar
8. DNS provider
9. Hosting provider
10. Video hosting
11. Study material storage

12. Student data export facility
13. Test data export facility
14. Attendance/biometric system details
15. Payment gateway details

19. Aur ek bahut important cheez – CONTRACT

Agar Classplus se service li gayi hai, to **agreement/invoice/subscription document** zaroor maango.

Poocho:

Classplus ke saath jo agreement/subscription liya gaya hai uski copy available hai?

Ismein check karna hai:

- Subscription duration
- Renewal
- Data ownership
- Data export
- App ownership
- Website ownership
- Domain ownership
- Content ownership
- Termination
- Migration
- Refund
- Developer account
- Technical support

Classplus ke terms ke mutabik platform/app/services Bunch Microtechnologies ke under managed hain, isliye actual contractual arrangement dekhna important hai. ([Classplus](#))

20. Sabse important: "Apna domain hai" aur "apna infrastructure hai" alag cheezein hain

Example:

text

DKMishra.com

DK Mishra ka domain

Lekin

Website

Classplus infrastructure

App

Classplus infrastructure

Database

Classplus infrastructure

Video hosting

Classplus infrastructure

Possible hai.

Isliye sirf domain dekhkar ye assume mat karna ki:

"Inka pura server inke paas hai."

21. Agar Classplus hai to custom software banate waqt kya hoga?

Ye future ke liye **bahut important architectural decision** hai.

Aapke paas 2 routes honge:

Route A — Existing Classplus ko continue karo

text

Classplus

Existing App

Existing Website

Existing Admin

Aur sirf additional system banao:

text

DK Mishra Custom AI System

AI Doubt

AI Analytics

Mistake Book

Adaptive Practice

Advanced Question Bank

Route B — Completely custom system

text

DK Mishra

Custom Website

—— Student Portal

—— Teacher Portal

—— Admin Portal

—— Parent Portal

└── AI System

Custom Backend

Then:

text

Custom Android App

Custom Backend

22. Main DK Mishra se ye exact message bhejne ko kahunga

Aap ye copy karke bhej sakte ho:

Sir, existing Mathematics Today app aur website ka complete technical setup samajhne ke liye mujhe kuch information chahiye. Password/OTP ki zarurat nahi hai. Sirf ownership, platform aur infrastructure details chahiye.

1. App kis platform/company se banaya gaya hai?
2. Classplus account hai ya custom system?
3. App Play Store account kis ke ownership mein hai?
4. App ka package name kya hai?
5. Admin panel ka URL kya hai?
6. Website URL kya hai?
7. Domain kis registrar se liya gaya hai aur ownership kis ke naam par hai?
8. DNS kis platform par managed hai?
9. Website/app ka hosting/server kaun provide karta hai?
10. Videos kis platform/server par stored hain?
11. PDFs/study material kaha stored hain?
12. Student data kis system mein stored hai?
13. Student data export (Excel/CSV/API) available hai?
14. Test/question-bank/result data export ho sakta hai?
15. Existing app mein kaun-kaun se features currently active hain?
16. Biometric attendance ka device/software/model kya hai? Kya API/export available hai?
17. Payment gateway kaunsa use hota hai?
18. SMS/WhatsApp/Email/Push notification ke liye kaunsa system use hota hai?
19. Classplus ke saath agreement/subscription/invoice available hai?
20. Agar future mein custom software develop karna ho to existing student data, content, tests aur videos migrate/export kar sakte hain ya nahi?

Saath mein please existing Admin Panel ke main sections ka screen recording/demo bhi provide kar dijiye: Dashboard, Students, Batches, Courses, Videos, Study Material, Tests, Results, Attendance, Fees, Notifications aur Reports.

Aur meri taraf se ek important advice

Abhi DK Mishra ke liye custom software coding start mat karo.

Pehle ye information collect karo:

text

```
EXISTING APP
  ↓
PLATFORM
  ↓
DOMAIN
  ↓
HOSTING
  ↓
DATABASE
  ↓
VIDEO STORAGE
```

↓
STUDENT DATA

↓
TEST DATA

↓
ATTENDANCE

↓
PAYMENT

↓
ADMIN PANEL

↓
OWNERSHIP

↓
DATA EXPORT / MIGRATION

Uske baad hum **"DK Mishra Existing System Technical Audit + Custom Software Migration Plan"** bana sakte hain. Isse humein clear ho jayega ki **Classplus ko replace karna hai, Classplus ke saath integrate karna hai, ya existing system ko hi base banakar AI layer add karni hai.**

Aur ek useful point: Classplus officially says its platform includes branded app, website, admin portal, assessments, stats, live classes, video lectures and website functionality, so the fact that Mathematics Today has an app **does not by itself mean DK Mishra has independently purchased/maintained all of those servers and software components.** (Classplus)

2026-09-25 22:29:36 You 

iska doc file bna ke do

 ChatGPT gpt-5-6

Bilkul 👍 Maine **poora technical information checklist DOCX** bana diya hai.

Isme included hai:

- Existing Mathematics Today App
- Play Store ownership
- Classplus/platform details
- Admin/Teacher Panel
- Domain & DNS
- Hosting/Server
- Database & Student Data

- Video & PDF storage
- Question Bank & Tests
- Biometric Attendance
- Payment Gateway
- Notifications
- Student Data
- Classplus Agreement/Subscription
- Admin Panel screenshots/demo checklist
- Data Migration requirements
- DK Mishra ko bhejne ke liye **ready-made message**
- Future custom software architecture
- Security reminder — passwords/OTP collect nahi karne hain

 **Download**

Download – DK Mishra Existing App Technical Setup Checklist.docx

2026-09-25 22:40:14 You 

mujhe ye batao pahle ki mujhe ek system banane se le kr play store pe host karne tk or management sytem banane tk kitna kharch or time lag sakti h

 ChatGPT gpt-5-6

Haan. Agar hum **DK Mishra Mathematics ke liye completely custom system** banana chahte hain — yani website + Android app + Admin/Teacher/Student/Parent management + Mathematics LMS + tests + attendance + AI — to cost ko sirf “app banane ka cost” samajhna galat hoga.

Main aapko **realistic India-based estimate** deta hoon.

1. Sabse pehle 3 possible approaches

Option A — Existing Classplus ko hi continue karna

Agar DK Mishra ka current Mathematics Today app Classplus par hai, to infrastructure ka bada part already available hai.

Current Classplus information ke according branded teaching platform/app plans available hain, aur September 2026 ke official-site comparison mein Classplus pricing around **₹29,999/year** se shown hai, features ke according variation ke saath. (Classplus)

Approx initial cost:

Item	Approx
Existing platform	₹30k–₹1L+/year
Custom website additions	₹30k–₹1L
AI integration	₹20k–₹1L+
Custom analytics	₹30k–₹1L
Total	₹80k–₹3L+

Time: लगभग **1–3 months**

लेकिन इसमें platform dependency रहेगी ।

2. Option B – Completely Custom DK Mishra System

Ye wahi system hai jiske baare mein hum discuss kar rahe the.

Architecture:

Development cost

Agar **aap khud development kar rahe ho**, to software-development cost dramatically kam ho sakti hai.

Self-developed version

Component	Approx cash cost
Domain	₹800–₹2,000/year
Cloud/server	₹1,500–₹8,000/month initially
Database	₹0–₹3,000/month initially
File/video storage	₹0–₹5,000/month initially
Email/SMS/WhatsApp	Usage based
AI API	Usage based
Google Play	\$25 one-time for full distribution account (Google Help)
SSL	Usually ₹0
Basic tools	₹0–₹5,000
Initial technical spend	roughly ₹10k–₹40k

But **your development time** becomes the major investment.

3. Agar professional developer/team se banwaoge

For the complete system:

Basic custom LMS

text

Student
Teacher
Admin
Courses
Videos
PDF
Tests

Approx:

₹2–4 lakh

Time:

2–4 months

Medium DK Mishra system

Add:

text

Student Management
Batch Management
Attendance
Question Bank
Topic Practice
Chapter Tests
Full Tests
Rank
Analytics
Parent Dashboard
Teacher Dashboard
Fees
Notifications

Approx:

₹4–8 lakh

Time:

4–7 months

4. Full system jo hum discuss kar rahe hain

Agar aap ye sab genuinely implement karte ho:

LMS

- Classes
- Chapters
- Topics

- Videos
- PDFs
- Formula bank
- Study material

Mathematics Practice Engine

- Topic practice
- Chapter practice
- Daily practice
- Weak-topic practice
- Adaptive practice
- Similar questions

Test Engine

- Topic test
- Chapter test
- Full Mathematics test
- Mock test
- Online/offline test
- Automatic evaluation
- Rank
- Percentile
- Solutions
- Detailed analysis

AI

- Photo doubt solver
- Step-by-step solution
- AI hints
- Similar questions
- AI question generation
- Handwritten solution analysis
- Mistake classification
- Personalized practice

- AI study planner

Coaching ERP

- Students
- Teachers
- Batches
- Fees
- Attendance
- Biometric integration
- Notifications
- Parents
- Reports

Analytics

- Student performance
- Batch performance
- Topic mastery
- Weak students
- Improvement tracking
- Teacher analytics

Apps

- Android student app
- Admin web
- Teacher web
- Parent access
- Backend/API

Then realistic professional development budget would be roughly:

₹8–15 lakh

and potentially more if the biometric integration, AI, video infrastructure and mobile apps become highly customized.

Time:

6–10 months

for a properly tested production system.

I would **not** promise a serious system like this in 1–2 months.

5. But ek smart approach hai

Aapko ₹10–15 lakh ek saath spend karne ki zarurat nahi hai.

Main DK Mishra ke liye **phased development** recommend karunga:

Phase 1 — Foundation

Time: 4–6 weeks

Build:

text

Admin
Student
Teacher
Batch
Login
Roles
Basic Attendance
Basic Course
Basic Question Bank

Approx professional cost:

₹1–2 lakh

Phase 2 — Mathematics Engine

Time: 6–8 weeks

text

Chapter
Topic
Subtopic
Practice
Question Bank
Topic Test
Chapter Test
Full Test
Results

Solutions
Rank

Approx:

₹1.5–3 lakh

Phase 3 — Analytics

Time: 4–6 weeks

text

Student Analytics
Topic Analytics
Chapter Analytics
Weak Topic
Mistake Book
Progress
Parent Dashboard
Teacher Dashboard

Approx:

₹1–2 lakh

Phase 4 — AI

Time: 6–10 weeks

text

AI Doubt Solver
Photo Question Solver
Step-by-step Solution
Similar Questions
AI Practice
AI Question Generator
AI Test Analysis
Personalized Study Plan

Approx:

₹2–4 lakh

AI API usage is then an ongoing operating expense rather than just a development expense.

Phase 5 — Mobile App + Production

Time: 4–8 weeks

text

Android App
Push Notifications
Production Backend
Database
Storage
Security
Analytics
Play Store
Testing
Crash monitoring

Approx:

₹1.5–3 lakh

6. Play Store ka actual kharcha

Current Google documentation ke according full Android distribution account ke liye **one-time US\$25 registration fee** hai. Google says full distribution has no install-count limit. ([Google Help](#))

Matlab:

text

Google Play registration
↓
One-time \$25
↓
App publish

Har download ka separate Play Store publishing fee nahi hota.

Lekin agar app ke andar digital purchases/subscriptions hain, Google Play service-fee rules applicable ho sakte hain. ([Google Help](#))

7. Website + Backend ka monthly running cost

Initial small institute ke liye roughly:

text

Domain

₹100-₹200/month equivalent

Backend

₹1,000-₹4,000/month

Database

₹0-₹3,000/month

File storage

₹500-₹3,000/month

Email

₹0-₹1,000/month

AI

₹1,000-₹10,000+/month

SMS/WhatsApp

Usage based

So starting stage par:

₹3,000-₹15,000/month

reasonable planning range hai.

Lekin agar students bahut zyada ho jayein aur video streaming heavy ho, cost considerably increase hogi.

8. Sabse bada hidden cost: Video

Ye bahut important hai.

Suppose:

text

5,000 students

×

100 videos

×

average 100 MB

Storage alone:

50,000 GB?

No — yahan calculation carefully karni hogi because $100 \text{ videos} \times 100 \text{ MB} = 10 \text{ GB}$ per student only if every student has a separate copy, but shared video storage means the content is stored once. Actual cost depends heavily on total unique video library and streaming bandwidth.

Example:

text

```
500 videos
×
300 MB
=
150 GB video library
```

Storage manageable ho sakta hai.

But:

text

```
150 GB storage
+
thousands of students
+
repeated streaming
```

mein **bandwidth/CDN** major cost ban sakta hai.

Isliye main raw videos ko normal VPS par rakhne ke bajay dedicated object storage/CDN/video platform architecture consider karunga.

9. Biometric bhi cost increase karega

Aapne specifically bataya hai ki DK Mishra biometric attendance use karta hai.

Agar existing biometric system ko integrate karna hai:

text

```
Biometric Device
  ↓
Device Software
  ↓
API
  ↓
Our Backend
  ↓
Attendance
```

Agar API available nahi hai, integration difficult ho sakti hai.

Isliye biometric device ka:

- brand
- model
- software
- API
- export format

pehle lena **bahut important** hai.

10. Mere hisaab se DK Mishra ke liye realistic budget

Agar aap **khud code karoge**:

MVP

₹30,000–₹1 lakh initial infrastructure + services

Time:

3–5 months

Good production version

₹1–₹3 lakh cash cost

Time:

5–8 months

because your own development time is not being counted as salary.

Agar **external professional team** develop kare:

Production-grade customized platform

₹6–₹12 lakh

Time:

6–10 months

Advanced AI + complete ERP + mobile ecosystem

₹10-₹20 lakh+

Time:

8-14 months

depending on scope, integrations, testing and number of mobile/web applications.

11. Ek aur option jo mujhe kaafi practical lagta hai

Current Mathematics Today/Classplus system ko immediately replace mat karo.

Pehle:

Phir jab custom system mature ho:

Isse coaching ka existing operation development ke dauran band nahi hoga.

12. Total picture

Agar mujhe abhi planning document mein ek number rakhna ho, to main ₹8–12 lakh + 6–10 months ko professional full-system planning budget maanunga.

Lekin agar aap khud development kar rahe ho, to cash budget ko ₹50k–₹2 lakh initial + monthly infrastructure/AI costs ke around plan kiya ja sakta hai, depending on how much you build yourself.

Important: ye quotation nahi hai; actual number existing Mathematics Today/Classplus setup, number of students, video library, biometric device/API, AI usage, app requirements aur data migration dekhne ke baad hi fix hoga.

Aur DK Mishra ke existing Classplus setup ko dekhna especially important hai, kyunki agar unke current platform mein already branded app, website, tests, content, student data etc. hai, to kuch components ko duplicate banane ki zarurat nahi padegi. Classplus currently markets branded apps, websites and teaching-management features for coaching/institutes. (Classplus)

Aapke case mein next logical step: pehle existing Mathematics Today app + Classplus ka complete feature/technical audit, phir main uske basis par exact module-wise cost + development timeline + team requirement (developer, designer, AI, DevOps) ka estimate bana sakta hoon.

2026-09-25 22:46:34 You 

biometrics kitne ke aayenge

 ChatGPT gpt-5-6

Haan, agar **DK Mishra coaching ke liye biometric attendance** lagani hai, to hardware ka cost bahut zyada nahi hai. 2026 ke current Indian market prices ke hisaab se roughly ye range hai: (Sohi Technology)

Approx price

Type	Approx device price	Coaching ke liye
Basic fingerprint	₹3,500–₹7,500	Small setup
Fingerprint + RFID/Card	₹6,000–₹12,000	Good option
Face recognition	₹8,000–₹20,000	Students ke liye convenient
Face + Fingerprint	₹10,000–₹20,000+	More flexible
Advanced face/AI	₹18,000–₹35,000+	Large institute

Current listings mein examples bhi mil rahe hain: (Moglix)

ZKTeco K40 Time & Attendanc...

₹5,461

Biometric Attendance Sy... ★ 5 (44)

eSSL Identix K30 Pro

₹6,960

Flipkart

ZKTeco MB400 Face + Fingerpr...

₹12,299

Amazon.in

eSSL F22 Fingerprint + RFID

₹8,750

NiceDeal Enterprises

Lekin DK Mishra ke case mein ek important baat hai

Agar hum **apna custom management system** bana rahe hain, to sirf ₹6,000 ki machine kharidna enough nahi hai.

Humein aisi machine chahiye jisme:

text

```
Biometric Machine
↓
Internet / LAN
↓
Attendance Software / API
↓
DK Mishra Backend
↓
```

Isliye purchase se pehle **API/SDK ya cloud-sync support** check karna bahut important hai.

Mere hisaab se budget

DK Mishra jaise coaching ke liye initial planning:

Machine: ₹7,000–₹15,000

Installation/network: ₹1,000–₹3,000

Software/cloud: ₹0–₹10,000+/year, provider par depend

Custom integration: ₹10,000–₹40,000+ development cost

➡ **Complete integrated setup roughly ₹20,000–₹60,000** mein plan kiya ja sakta hai, depending on the device and integration.

Aur ek achhi baat: agar existing biometric machine already lagi hui hai, **nayi machine kharidne ki zarurat bhi nahi ho sakti**. Pehle uska **brand + exact model number** pata karna chahiye; kuch existing eSSL/ZKTeco devices ko compatible software/server par repoint kiya ja sakta hai. (aionhrms.com)

Aap DK Mishra se biometric machine ka photo + model number mangwa lo. Uske basis par main bata sakta hoon ki **wo machine hamare custom system ke saath API se connect ho sakti hai ya nahi**, aur nayi machine ki zarurat padegi ya nahi.

2026-09-25 22:49:51

You

axa mujhe ye batao ki software kon kon banaungi mai ye coaching system ke liye

ChatGPT gpt-5-6

Haan 👍 Agar aap **DK Mishra Mathematics ke liye khud software develop** karne wali ho, to main is project ko ek single “software” nahi, balki **5 major applications + backend infrastructure** mein divide karunga.

1. Student Android App 📱

Ye sabse important front-facing application hogi.

Student isme:

- Login/Register

- Profile
- Batch
- Attendance
- Classes
- Videos
- PDF/Study Material
- Chapter → Topic → Subtopic
- Topic-wise Practice
- Chapter Practice
- Tests
- Mock Tests
- Results
- Rank/Percentile
- Test Solutions
- Mistake Book
- Weak Topics
- Progress
- Formula Bank
- AI Doubt Solver
- Photo se Maths Question Solve
- Similar Questions
- Personalized Practice
- Notifications

use karega.

Technology:

- React Native **ya** Flutter
- Backend API
- Push notifications

Agar aap already React/TypeScript jaanti ho, to **React Native** aapke liye practical choice ho sakti hai.

2. Admin Management System

Ye DK Mishra sir/management ke liye hoga.

text

ADMIN DASHBOARD

- |
- |—— Dashboard
- |—— Students
- |—— Teachers
- |—— Batches
- |—— Courses
- |—— Classes
- |—— Attendance
- |—— Biometric
- |—— Question Bank
- |—— Practice Sets
- |—— Tests
- |—— Results
- |—— Rankings
- |—— Study Material
- |—— Videos
- |—— Fees
- |—— Notifications
- |—— Parents
- |—— Reports
- |—— AI Management
- |—— Settings

Admin yahan se **poore coaching ko manage** karega.

3. Teacher Panel

Teacher ko student ke comparison mein different permissions milengi.

Teacher:

text

Teacher Dashboard

- |
- |—— My Batches
- |—— Students
- |—— Attendance
- |—— Chapters
- |—— Topics
- |—— Questions
- |—— Practice Sets
- |—— Tests

- Results
- Solutions
- Doubts
- Analytics

Teacher dekh sakta hai:

Kaunsa student kis topic mein weak hai?

Example:

text

Rahul	
Algebra	82%
Trigonometry	76%
Calculus	48% ← Weak
Matrices	71%

Teacher phir us student ko targeted practice de sakta hai.

4. Parent Portal

Parent ke liye separate application banana initially zaroori nahi hai.

Student app ke andar Parent Mode ya separate web portal bana sakte ho.

Parent dekh sakta hai:

- Attendance
- Test marks
- Rank
- Performance
- Weak topics
- Improvement
- Fees
- Upcoming tests
- Teacher remarks
- Notifications

Example:

text

STUDENT PERFORMANCE

Attendance 92%

Tests

Algebra	78%
Trigonometry	64%
Calculus	51%
Matrices	82%

Weak Topic:

Integration

Recommended:

20 Integration Questions

5. Website

Website ko bhi do parts mein rakhna better hoga.

Public Website

text

mathematicstoday.in

Pages:

- Home
- About DK Mishra
- Courses
- Batches
- Results
- Faculty
- Testimonials
- Contact
- Login

Student Web Portal

text

Student browser se bhi login kar sake.

6. Backend — sabse important part ⚙️

Ye user ko directly dikhega nahi, lekin poore system ka **brain** hoga.

Aapke existing technical skills ko dekhte hue:

Recommended:

text

Node.js
Express.js
TypeScript
PostgreSQL
Prisma
JWT
REST API

Architecture:

text

7. Database 🗄️

Main **PostgreSQL** recommend karunga.

Tables approximately:

text

users
students
parents
teachers
admins

batches
courses
chapters
topics
subtopics

questions
question_options
question_solutions

practice_sets
practice_attempts

tests
test_questions
test_attempts
test_results

attendance
biometric_logs

fees
payments

study_materials
videos

student_progress
topic_mastery
mistakes

doubts
ai_solutions

notifications

Baad mein requirements ke according schema expand hoga.

8. AI System 🤖

AI ko backend ke andar directly random chatbot ki tarah nahi lagana hai.

Proper AI services:

text

AI ENGINE

- |
- |—— Maths Question Solver
- |—— Photo Question Solver
- |—— Step-by-Step Explanation
- |—— Hint Generator
- |—— Similar Question Generator
- |—— Question Generator
- |—— Mistake Analyzer
- |—— Weak Topic Detector
- |—— Personalized Practice
- |—— Study Planner

Example:

Student photo upload kare:

text

9. Biometric Integration

Ye separate software nahi, **integration module** hoga.

text

Biometric Machine

Device API / Software

↓
Attendance Service
↓
DK Mishra Backend
↓
PostgreSQL
↓
Student App

Isliye machine kharidne se pehle model/API check karna zaroori hai.

10. Video & File Storage

Videos ko PostgreSQL mein store nahi karna.

Architecture:

```
text

PostgreSQL
  |
  └── Video ID / URL

Actual Video
  ↓
Object Storage / Video CDN
```

Similarly:

```
text

PDF
Images
Question Images
Certificates
```

object storage mein.

11. Notifications Service

Backend se:

```
text

Push Notification
  |
  └── Test Reminder
```

- Result Published
- Attendance
- New Class
- New Material
- Important Announcement

Firebase Cloud Messaging use kar sakte ho.

12. Super Admin

Agar future mein DK Mishra ke multiple branches ho jayein, to ek additional layer useful hogi:

text

SUPER ADMIN

- Motihari Branch
- Branch 2
- Branch 3
- Global Analytics

Lekin **MVP mein iski zarurat nahi.**

13. Aapko actual mein kitne software deploy karne padenge?

Main initial version mein ye rakhunga:

System	Type
Student App	Android
Admin Panel	Web
Teacher Panel	Web
Parent Portal	Web
Public Website	Web
Backend API	Server
AI Service	Backend service
Database	PostgreSQL
File/Video Storage	Cloud
Biometric Integration	Backend module

14. Recommended technology stack

Aapke existing React/Node knowledge ko dekhte hue:

text

FRONTEND

React

TypeScript

Vite

Tailwind CSS

MOBILE

React Native

TypeScript

BACKEND

Node.js

Express

TypeScript

DATABASE

PostgreSQL

Prisma

AUTH

JWT

Refresh Tokens

STORAGE

S3-compatible Object Storage

NOTIFICATION

Firebase Cloud Messaging

AI

LLM API

Vision/Image processing

DEPLOYMENT

Frontend → Vercel

Backend → Railway / AWS

Database → PostgreSQL

Storage → Object Storage

15. Lekin sab kuch ek saath mat banao

Aapke project ke liye main development order ye rakhunga:

Phase 1 — Foundation

text

Authentication

Users

Roles

Students

Teachers

Batches

Courses

Chapters

Topics

Phase 2 — Mathematics

text

Question Bank

Practice

Tests

Results

Solutions

Rank

Phase 3 — Coaching ERP

text

Attendance

Biometric

Fees

Notifications

Parents

Reports

Phase 4 — Intelligence

text

Weak Topic

Mistake Book

Phase 5 — AI

text

AI Doubt
Photo Solver
AI Questions
Similar Questions
AI Analysis
Study Planner

Phase 6 — Mobile + Production

text

React Native App
Play Store
Production Infrastructure
Security
Monitoring
Backup

सबसे important बात

Aapke case mein **“Play Store app banana”** project ka sirf ek part hai.

Actual product ye hai:

text

BIOMETRIC / PAYMENT

Agar aap ye khud develop karna chahti ho, to main aapke existing React + Node.js knowledge ke according isko build karne ka exact roadmap bana sakta hoon — folder structure, database schema, APIs, admin modules, student app modules aur kis phase mein kya code karna hai, sab step-by-step.

2026-09-26 06:23:55 You 

oo premium v banana chahte h jaise koe student bahr se aaya uske liye

 ChatGPT gpt-5-6

Haan, **ye** **bahut important requirement hai**. Agar DK Mishra ke paas Motihari ke local students ke saath **bahar se aane wale students** bhi hain, to system ko sirf LMS nahi balki **Premium Student / Residential Student Management System** tak extend kiya ja sakta hai.

Main isko 2 categories mein design karunga:

1. Regular / Local Student

text

Admission
↓
Batch
↓
Classes
↓
Attendance
↓
Practice
↓
Tests
↓
Results

2. Premium / Outstation Student

Bahar se aaya student additional services le sakta hai:

text

Premium Student

- |
- |—— Coaching
- |—— Accommodation
- |—— Food/Mess
- |—— Room/Hostel
- |—— Attendance
- |—— Study Schedule
- |—— Personal Progress
- |—— Parent Monitoring
- |—— Fees
- |—— Complaints
- |—— Support

Premium module mein kya-kya hona chahiye?

Accommodation

- Room number
- Bed number
- Room type
- Check-in date
- Check-out date
- Room allocation
- Room change
- Hostel/PG details
- Occupancy

Food/Mess

- Breakfast
- Lunch
- Dinner
- Mess attendance
- Meal preferences
- Monthly mess charges

Parents

Bahar ke students ke parents ke liye:

- Student attendance
- Coaching attendance
- Hostel attendance
- Test results
- Fees
- Food/mess status
- Important notifications
- Complaints/issues

 Premium Billing

Ek student ka single account ho:

text

Monthly Fees

Coaching	₹X
Accommodation	₹X
Food/Mess	₹X
Study Material	₹X
Other	₹X

Total	₹X

Aur admin ko:

Paid / Pending / Overdue clearly dikhe.

 Student Support

Outstation student ke liye:

text

Raise Request

↓

Category

☐ Room Problem

☐ Food Problem

☐ Medical/Emergency

☐ Study Problem

☐ Fee Problem

□ Other

Admin/warden request ko assign karke status update kar sake:

text

Open

Assigned

In Progress

Resolved

Ek aur powerful feature

Parent + Student + Coaching + Accommodation ko ek hi profile se connect karna:

text

Isse DK Mishra ke liye system **normal coaching LMS se kaafi bada platform** ban jayega.

Lekin ek important distinction

Agar DK Mishra **khud hostel/PG provide nahi karte**, to Hostel/Accommodation module directly core system mein add karna zaroori nahi hai. Pehle unse confirm karna chahiye:

“Kya DK Mishra Mathematics ke outstation students ke liye accommodation/PG/hostel aur mess facility directly manage karta hai, ya students bahar independently stay karte hain?”

Agar woh accommodation provide karte hain, to main **DK Mishra system ka complete Premium/Residential module** bhi architecture mein add karunga.

Achha 😊 ab samajh gaya. Aap **residential student** ki baat nahi kar rahe ho. Aapka matlab hai:

DK Mishra Mathematics ka course koi bhi student – Motihari ka ho ya India ke kisi bhi city ka – online purchase karke padh sake.

Bilkul. Is requirement ke liye system mein **Online Course Selling / E-learning Commerce** module add karna hoga.

System ka structure

Online student kya kar payega?

Website/app open karega:

Courses → Mathematics

Example:

Course	Price
Class 10 Complete Mathematics	₹999

Course	Price
Class 11 Mathematics	₹1,999
Class 12 Mathematics	₹2,499
Bihar Board Mathematics	₹1,499
Complete Revision Course	₹799
Test Series	₹499

Student:

Course → Buy Now → Payment → Course Unlock

Course purchase flow

Course page पर

- Course name
- Teacher
- Class
- Board

- Chapters
- Topics
- Number of lectures
- PDFs
- Practice questions
- Tests
- Duration/validity
- Price
- Discount
- Demo videos
- Course description
- What student will learn

Offline + Online दोनों को एक ही system में रखना

यह आपके project की सबसे अच्छी architecture होगी ।

Student type:

text

Student Type

- ☐ Offline Student
- ☐ Online Student
- ☐ Hybrid Student

Hybrid student बहुत useful होगा ।

उदाहरण:

Motihari का student offline coaching भी करता है और घर पर revision के लिए online course भी खरीदता है ।

उसके dashboard में:

text

MY LEARNING

Offline Batch
Class XII - Batch A

Online Courses

- ✓ Calculus Masterclass
- ✓ Integration Revision

Tests

12 Completed

Attendance

94%

AI Doubts

8

Admin में Course Selling System

DK Mishra admin panel में:

text

COURSE MANAGEMENT

Create Course

Course Information

Chapters

Topics

Videos

PDFs

Practice Sets

Tests

Price

Validity

Publish

फिर course automatically public website/app पर दिखाई देगा ।

Payment system

Online student के लिए payment gateway जरूरी होगा ।

text

UPI
Cards
Net Banking
Wallets

Payment successful होने के बाद:

text

Payment Gateway
↓
Webhook
↓
Backend
↓
Verify Payment
↓
Create Enrollment
↓
Unlock Course

Important: सिर्फ frontend से "payment successful" देखकर course unlock नहीं करना चाहिए । Backend ko payment gateway webhook/API से payment verify करना चाहिए ।

Course validity भी रख सकते हैं

उदाहरण:

text

Course Validity

3 Months
6 Months
1 Year
Until Exam
Lifetime

Admin course के हिसाब से validity choose कर सके ।

Coupon/Discount

Ye bhi useful होगा:

text

Original Price: ₹1,999

Discount: 25%

Coupon: DKMATH25

Final Price: ₹1,499

Admin:

- Coupon create
- Percentage discount
- Fixed discount
- Expiry
- Usage limit

set कर सके ।

Online Student के लिए अलग dashboard

text

ONLINE STUDENT DASHBOARD

Welcome, Rahul 🙌

My Courses

- |—— Class 12 Mathematics
- |—— Integration Masterclass
- |—— Test Series 2027

Continue Learning

Integration – Lecture 8

Practice

45 Questions Pending

Tests

3 Tests Available

AI Doubt Solver

Ask a Question 📷

सबसे important: AI भी online students को मिलेगा

बाहर का student सिर्फ videos खरीदकर नहीं रहेगा ।

वह:

Question की photo upload → AI solution → concept explanation → similar questions → practice कर सकेगा ।

इससे आपका platform सिर्फ **course-selling website** नहीं रहेगा, बल्कि **complete Mathematics learning platform** बनेगा ।

इसलिए अब DK Mishra system में एक और बड़ा module add हो गया:

text

DK MISHRA MATHOS

Yaani ab hum jo software plan kar rahe hain, uska correct description होगा:

DK Mishra Mathematics — Complete Coaching Management + LMS + Online Course Selling + AI Mathematics Learning Platform

और यह requirement आपको DK Mishra से पूछने वाली requirement form में भी add करनी चाहिए: कौन-कौन से courses online बेचने हैं, price क्या होगा, validity क्या होगी, कौन से courses public होंगे, payment gateway कौन सा होगा, और purchased course में कौन-कौन से videos/tests/material unlock होंगे.

2026-09-26 06:28:16 You 

ab isme kya kya add hoga 1. Student Android App 

Ye sabse important front-facing application hogi.

Student isme:

Login/Register
Profile
Batch
Attendance
Classes
Videos
PDF/Study Material
Chapter → Topic → Subtopic
Topic-wise Practice
Chapter Practice
Tests
Mock Tests
Results
Rank/Percentile
Test Solutions
Mistake Book
Weak Topics
Progress
Formula Bank
AI Doubt Solver
Photo se Maths Question Solve
Similar Questions

Personalized Practice

Notifications

use karega.

Technology:

React Native ya Flutter

Backend API

Push notifications

Agar aap already React/TypeScript jaanti ho, to React Native aapke liye practical choice ho sakti hai.

ChatGPT gpt-5-6

Haan, ab **Online Course Selling** wali requirement bhi add karni chahiye. Aur kyunki DK Mishra ka system sirf offline coaching nahi rahega, Student App ko main **Online + Offline + Hybrid Student** support ke saath design karunga.

1. Student Android App – Complete Feature List

A. Account & Profile

- Login
- Registration
- Mobile OTP verification
- Email login
- Forgot password
- Student profile
- Profile photo
- Father/Mother details
- Class
- Board
- Batch
- Student ID
- Account settings

- Change password
- Logout

B. Student Type

Student ke account mein type maintain hoga:

- **Offline Student**
- **Online Student**
- **Hybrid Student**

Example:

Motihari ka student → Offline

Delhi ka student → Online

Motihari ka student + online course → Hybrid

C. Home Dashboard

Student ko login karte hi:

- Continue Learning
- Today's Classes
- Upcoming Tests
- Pending Practice
- Recent Results
- Attendance
- Weak Topics
- Recommended Practice
- Recent Notifications
- AI Doubt Solver

dikhna chahiye.

Example:

text

Hello Rahul 🙌

Continue Learning
Integration – Lecture 8

Today's Test

Your Attendance
92%

Weak Topic
Integration

Recommended
20 Practice Questions

[Ask AI Doubt 📷]

D. Online Course Store

Ye **naya major module** add hoga.

Student app mein:

Courses → Browse Courses

Course categories

- Class 10 Mathematics
- Class 11 Mathematics
- Class 12 Mathematics
- Bihar Board
- CBSE
- JEE/Competitive – **sirf agar DK Mishra actually offer kare**
- Test Series
- Revision Courses
- Chapter-wise Courses

Course page

- Course name
- Teacher
- Class
- Board
- Description
- Chapters

- Topics
- Number of lectures
- PDFs
- Practice sets
- Tests
- Demo lecture
- Course duration
- Course validity
- Price
- Discount
- Reviews
- What you'll learn

Purchase

text

Course
↓
Buy Now
↓
Payment
↓
Payment Verification
↓
Enrollment
↓
Course Unlock

E. Payments & Orders

Student app mein:

- Buy Course
- Cart — agar multiple products sell karne hain
- Coupon
- Discount
- Payment
- Payment history

- Order history
- Invoice/receipt
- Failed payment
- Refund status
- Purchased courses

F. My Courses

Student ke purchased courses:

text

MY COURSES

Class 12 Mathematics
Progress: 64%

Integration Masterclass
Progress: 32%

Mathematics Test Series
8/20 Tests Completed

Course ke andar:

text

Course

```
|
|—— Chapter 1
|   |—— Topic 1
|   |—— Topic 2
|   |—— Practice
|
|—— Chapter 2
|   |—— Topic 1
|   |—— Test
|
|—— Chapter 3
```

G. Classes & Videos

- Live classes

- Recorded classes
 - Upcoming classes
 - Class schedule
 - Continue watching
 - Video progress
 - Playback resume
 - Chapter-wise videos
 - Topic-wise videos
 - Download/offline viewing — **only if business rules allow**
-

H. Study Material

- PDF notes
 - Chapter notes
 - Formula sheets
 - Question papers
 - Practice sheets
 - Solutions
 - Important questions
 - Revision material
-

I. Mathematics Learning Structure

Ye system ka core hoga:

text

```
Class
↓
Board
↓
Subject
↓
Chapter
↓
Topic
↓
Subtopic
↓
```

Example:

text

```
Class 12
↓
Mathematics
↓
Integrals
↓
Indefinite Integration
↓
Substitution Method
```

J. Practice Engine

Student practice kar sake:

Topic Practice

Specific topic ke questions.

Chapter Practice

Complete chapter.

Daily Practice

Daily recommended questions.

Weak Topic Practice

Student ke weak areas ke questions.

Custom Practice

Student khud:

- Number of questions
- Difficulty
- Topic

select kar sake.

K. Tests

- Topic Test
- Chapter Test
- Full Mathematics Test
- Mock Test
- Revision Test
- Course Test
- Test Series
- Timed Test

Test ke andar:

- Timer
- Question navigation
- Mark for review
- Skip
- Submit
- Auto-save
- Auto-submit

L. Results & Analysis

Test ke baad:

- Marks
- Total marks
- Percentage
- Rank
- Percentile
- Correct answers
- Wrong answers
- Unattempted
- Time taken
- Accuracy

Aur deeper analysis:

text

Algebra	82%	
Trigonometry	76%	
Calculus	48%	← Weak
Matrices	85%	

M. Test Solutions

Test complete hone ke baad:

text

Question

Your Answer

Correct Answer

Step-by-step Solution

Concept Used

Common Mistake

Similar Questions

Ye DK Mishra ke platform ka **strong feature** ban sakta hai.

N. Mistake Book

Student ke wrong questions automatically:

My Mistakes

mein save ho sakte hain.

Categories:

- Concept error
- Formula error
- Calculation error
- Sign mistake
- Silly mistake
- Time-management issue

Student baad mein:

kar sakega.

System automatically identify kare:

text

Student Performance

Integration	42%	
Probability	58%	
Matrices	81%	
Relations	76%	

Then:

“Aapka Integration weak hai. Aaj 15 targeted questions practice karein.”

Student dekh सके:

- Overall progress
- Course progress
- Chapter progress
- Topic mastery
- Practice accuracy
- Test improvement
- Attendance
- Study time

Example:

text

Mathematics Mastery

Algebra	84%
Calculus	61%

Geometry	79%
Probability	72%

Q. Formula Bank

Searchable formula library:

text

Search Formula...

Integration

Derivatives

Trigonometry

Matrices

Probability

Coordinate Geometry

Student formula save/favourite bhi kar sake.

R. AI Doubt Solver

Student:

Ask Doubt

→ Text type kare ya photo upload kare.

text

 Upload Question

AI understands question

Step-by-step solution

Concept explanation

Hint

Similar questions

AI ko sirf answer dene ke bajay **learning explanation** dena chahiye.

S. Photo Maths Solver

Student handwritten question ki photo upload kare.

AI:

- 1. Question identify kare
- 2. Mathematical expression understand kare
- 3. Solution generate kare
- 4. Steps explain kare
- 5. Final answer de
- 6. Related concept bataye

T. Similar Questions

Example student ne:

Integration ka question solve kiya.

System:

text

Similar Questions

Easy	3
Medium	5
Hard	2

generate/show kar sakta hai.

U. Personalized Practice

Student ke:

- Wrong answers
- Weak topics
- Test performance
- Difficulty level
- Practice history

ke basis par system questions recommend kare.

text

Today:

15 Integration

5 Probability

5 Trigonometry

V. Notifications

- New course
- New lecture
- Upcoming class
- Test reminder
- Result published
- New study material
- Weak-topic reminder
- Assignment/practice reminder
- Important announcement
- Payment confirmation
- Course expiry reminder

W. Parent Access

Parent ko student ke account se connected access diya ja sakta hai.

Parent देख सके:

- Attendance
- Marks
- Rank
- Progress
- Weak topics
- Test history
- Fees
- Course purchase
- Notifications

X. Fees / Subscription

Offline students ke liye:

- Coaching fees
- Installments
- Pending fees
- Payment history

Online students ke liye:

- Course purchases
- Course validity
- Orders
- Payment history
- Refund status

Y. Support / Doubt Escalation

AI answer se problem ho to:

text

```
AI Doubt
↓
Still confused?
↓
Ask Teacher
↓
Teacher receives doubt
↓
Teacher responds
```

Ye feature especially valuable hoga, kyunki AI **teacher ko replace nahi karega**.

Z. Settings

- Profile
- Language
- Notification settings
- Password

- Privacy
- Download settings
- Help & Support
- Terms
- Privacy Policy
- Logout
- Delete account

Final Student App Structure

Main navigation kuch aisi rakhunga:

text

Bottom Navigation

[Home] [Courses] [Practice] [Tests] [Profile]

Aur overall app modules:

text

- |—— My Courses ← NEW
- |—— Orders & Payments ← NEW
- |—— Classes
- |—— Videos
- |—— Study Material
- |—— Mathematics Structure
- |—— Practice
- |—— Tests
- |—— Results
- |—— Solutions
- |—— Mistake Book
- |—— Weak Topics
- |—— Progress
- |—— Formula Bank
- |—— AI Doubt Solver
- |—— Photo Solver
- |—— Similar Questions
- |—— Personalized Practice
- |—— Parent Access
- |—— Notifications
- |—— Fees
- |—— Support / Ask Teacher

Mere hisaab se Student App ko ab isi complete scope ke saath define karna chahiye. Iske baad Admin Panel ko design karte waqt har feature ka corresponding management module banana hoga—especially **Course Store, Pricing, Coupons, Orders, Enrollments, Course Content, Question Bank, AI, Tests aur Student Analytics.**

2026-09-26 06:31:43 You 

ab complete system ko update kr ke de do

1. Student Android App 

Ye sabse important front-facing application hogi.
Student isme:

- Login/Register
- Profile
- Batch
- Attendance
- Classes
- Videos
- PDF/Study Material

- Chapter → Topic → Subtopic
- Topic-wise Practice
- Chapter Practice
- Tests
- Mock Tests
- Results
- Rank/Percentile
- Test Solutions
- Mistake Book
- Weak Topics
- Progress
- Formula Bank
- AI Doubt Solver
- Photo se Maths Question Solve
- Similar Questions
- Personalized Practice
- Notifications

use karega.

Technology:

- React Native **ya** Flutter
- Backend API
- Push notifications

Agar aap already React/TypeScript jaanti ho, to **React Native** aapke liye practical choice ho sakti hai.

—

2. Admin Management System

Ye DK Mishra sir/management ke liye hoga.

```text

ADMIN DASHBOARD

|

|—— Dashboard

|—— Students

|—— Teachers

|—— Batches

- └── Courses
- └── Classes
- └── Attendance
- └── Biometric
- └── Question Bank
- └── Practice Sets
- └── Tests
- └── Results
- └── Rankings
- └── Study Material
- └── Videos
- └── Fees
- └── Notifications
- └── Parents
- └── Reports
- └── AI Management
- └── Settings

...

Admin yahan se \*\*poore coaching ko manage\*\* karega.

—

### # 3. Teacher Panel

Teacher ko student ke comparison mein different permissions milengi.

Teacher:

```text

Teacher Dashboard

- |
- └── My Batches
- └── Students
- └── Attendance
- └── Chapters
- └── Topics
- └── Questions
- └── Practice Sets
- └── Tests
- └── Results

|—— Solutions
|—— Doubts
|—— Analytics

...

Teacher dekh sakta hai:

> Kaunsa student kis topic mein weak hai?

Example:

```text

Rahul

Algebra 82%

Trigonometry 76%

Calculus 48% ← Weak

Matrices 71%

```

Teacher phir us student ko targeted practice de sakta hai.

—

4. Parent Portal 👤

Parent ke liye separate application banana initially zaroori nahi hai.
Student app ke andar Parent Mode ya separate web portal bana sakte ho.

Parent dekh sakta hai:

- Attendance
- Test marks
- Rank
- Performance
- Weak topics
- Improvement
- Fees
- Upcoming tests
- Teacher remarks
- Notifications

Example:

```
```text
```

## STUDENT PERFORMANCE

Attendance     92%

### Tests

——	Algebra	78%
——	Trigonometry	64%
——	Calculus	51%
——	Matrices	82%

Weak Topic:

Integration

Recommended:

20 Integration Questions

```
```
```

—

5. Website

Website ko bhi do parts mein rakhna better hoga.

Public Website

```
```text
```

mathematicstoday.in

```
```
```

Pages:

- Home
- About DK Mishra
- Courses
- Batches
- Results
- Faculty
- Testimonials

- Contact

- Login

Student Web Portal

```
```text
```

student.domain.com

```
```
```

Student browser se bhi login kar sake.

—

6. Backend — sabse important part ⚙️

Ye user ko directly dikhega nahi, lekin poore system ka **brain** hoga.

Aapke existing technical skills ko dekhte hue:

Recommended:

```
```text
```

Node.js

Express.js

TypeScript

PostgreSQL

Prisma

JWT

REST API

```
```
```

Architecture:

```
```text
```

Android App

|

REST API

|

Node + Express

## # 7. Database

Main **PostgreSQL** recommend karunga.

Tables approximately:

``text

users

students

parents

teachers

admins

batches

courses

chapters

topics

subtopics

questions

question\_options

question\_solutions

practice\_sets

practice\_attempts

tests

test\_questions

test\_attempts

test\_results

attendance

biometric\_logs

fees  
payments

study\_materials  
videos

student\_progress  
topic\_mastery  
mistakes

doubts  
ai\_solutions

notifications  
...

Baad mein requirements ke according schema expand hoga.

—

## # 8. AI System

AI ko backend ke andar directly random chatbot ki tarah nahi lagana hai.

Proper AI services:

```text

AI ENGINE

|

├── Maths Question Solver

├── Photo Question Solver

├── Step-by-Step Explanation

├── Hint Generator

├── Similar Question Generator

├── Question Generator

├── Mistake Analyzer

├── Weak Topic Detector

├── Personalized Practice

└── Study Planner

```

Example:

Student photo upload kare:

```
```text
```

 Question

Image Processing

Math Problem Extraction

AI Solver

Solution

Concept

Common Mistake

Similar Questions

```
```
```

—

## # 9. Biometric Integration

Ye separate software nahi, **integration module** hoga.

```
```text
```

Biometric Machine

Device API / Software

Attendance Service

DK Mishra Backend

PostgreSQL

Student App

```
```
```

Isliye machine kharidne se pehle model/API check karna zaroori hai.

—

## # 10. Video & File Storage

Videos ko PostgreSQL mein store nahi karna.

Architecture:

Similarly:

```
graph TD
 A[PDF] --> B[Images]
 B --> C[Question Images]
 C --> D[Certificates]
```

object storage mein.

—

## # 11. Notifications Service

Backend se:

- |—— Attendance
- |—— New Class
- |—— New Material
- |—— Important Announcement

...

Firebase Cloud Messaging use kar sakte ho.

—

## # 12. Super Admin

Agar future mein DK Mishra ke multiple branches ho jayein, to ek additional layer useful hogi:

```text

SUPER ADMIN

- |
- |—— Motihari Branch
- |—— Branch 2
- |—— Branch 3
- |—— Global Analytics

...

Lekin **MVP** mein iski zarurat nahi**.**

—

13. Aapko actual mein kitne software deploy karne padenge?

Main initial version mein ye rakhunga:

| SystemType | | |
|----------------|-----------------|--|
| Student App | Android | |
| Admin Panel | Web | |
| Teacher Panel | Web | |
| Parent Portal | Web | |
| Public Website | Web | |
| Backend API | Server | |
| AI Service | Backend service | |

| Database | PostgreSQL |
| File/Video Storage | Cloud |
| Biometric Integration | Backend module |

Yaani user ko **5 interfaces** dikhenge, lekin backend mein multiple services hongi.

—

14. Recommended technology stack

Aapke existing React/Node knowledge ko dekhte hue:

```text

FRONTEND

React

TypeScript

Vite

Tailwind CSS

MOBILE

React Native

TypeScript

BACKEND

Node.js

Express

TypeScript

DATABASE

PostgreSQL

Prisma

AUTH

JWT

Refresh Tokens

STORAGE

S3-compatible Object Storage

NOTIFICATION

Firebase Cloud Messaging

AI

LLM API

Vision/Image processing

DEPLOYMENT

Frontend → Vercel

Backend → Railway / AWS

Database → PostgreSQL

Storage → Object Storage

...

—

# 15. Lekin sab kuch ek saath mat banao

Aapke project ke liye main development order ye rakhunga:

### Phase 1 — Foundation

```text

Authentication

Users

Roles

Students

Teachers

Batches

Courses

Chapters

Topics

```

### Phase 2 — Mathematics

```text

Question Bank

Practice

Tests

Results

Solutions

Rank

...

Phase 3 — Coaching ERP

```text

Attendance

Biometric

Fees

Notifications

Parents

Reports

...

### ### Phase 4 — Intelligence

```text

Weak Topic

Mistake Book

Analytics

Personalized Practice

...

Phase 5 — AI

```text

AI Doubt

Photo Solver

AI Questions

Similar Questions

AI Analysis

Study Planner

...

### ### Phase 6 — Mobile + Production

```text

React Native App

Play Store

Production Infrastructure

Security

Monitoring

Backup

...

—

सबसे important बात

Aapke case mein **“Play Store app banana”** project ka sirf ek part hai**”**.

Actual product ye hai:

```text

DK MISHRA MATHOS

|

...

**“Agar aap ye khud develop karna chahti ho, to main aapke existing React + Node.js knowledge ke according isko build karne ka exact roadmap bana sakta hoon — folder structure, database schema,**

ChatGPT gpt-5-6

Bilkul. Ab tak jo bhi requirements humne discuss ki hain—**offline coaching + outside/online students + course selling + LMS + coaching management + AI + biometric + parent system**—un sabko combine karke main isko **final system scope** ke रूप में update kar raha hoon.

## **DK MISHRA MATHEMATICS – COMPLETE DIGITAL PLATFORM**

Ye sirf LMS nahi hoga. Final product ko hum:

**DK Mishra Mathematics – Coaching Management + LMS + Online Course Selling + AI Mathematics Learning Platform**

ke रूप में design karenge.

### 1. **Student Android App**

Student app mein **offline, online aur hybrid** tino students support honge.

#### **Account & Profile**

- Login
- Registration
- Mobile OTP
- Email login
- Forgot password
- Student profile
- Profile photo
- Parent details
- Class
- Board
- Batch
- Student ID
- Student type:
  - Offline

- Online
- Hybrid

## Dashboard

- Continue Learning
- Today's Classes
- Upcoming Tests
- Pending Practice
- Recent Results
- Attendance
- Weak Topics
- Recommended Practice
- Notifications
- AI Doubt shortcut

## Online Course Store

Bahar ka koi bhi student course purchase kar sakega.

## Course Store

- All Courses
- Class-wise courses
- Board-wise courses
- Chapter-wise courses
- Revision courses
- Test series
- Special courses
- Search
- Filters
- Course details
- Demo lecture
- Course curriculum
- Price
- Discount

- Validity
- Reviews

## Purchase Flow

text

```
graph TD; A[Browse Course] --> B[Course Details]; B --> C[Buy Now]; C --> D[Payment Gateway]; D --> E[Payment Verification]; E --> F[Order Created]; F --> G[Course Automatically Unlocked];
```

## Orders & Payments

- My Orders
- Payment History
- Invoice/Receipt
- Coupon
- Discount
- Failed Payment
- Refund Status
- Purchased Courses
- Course Expiry

## 2. 📖 My Courses / LMS

Student ke purchased courses aur offline courses yahan honge.

text

```
graph TD; A[My Courses] --> B[Class 12 Mathematics] --> C[Chapter 1];
```

## Learning Features

- Live Classes
- Recorded Classes
- Video lectures
- Resume video
- PDF/notes
- Formula sheets
- Question papers
- Solutions
- Practice sets
- Chapter resources

## 3. Mathematics Practice Engine

Ye DK Mishra platform ka core feature hoga.

### Practice Types

- Topic-wise Practice
- Subtopic Practice
- Chapter Practice
- Daily Practice
- Custom Practice
- Weak Topic Practice
- Previous Mistake Practice
- Recommended Practice
- Personalized Practice

## Difficulty

- Easy
- Medium
- Hard

Future mein AI dynamically difficulty adjust kar sakta hai.

---

## 4. Test & Examination System

### Test Types

- Topic Test
- Chapter Test
- Full Mathematics Test
- Mock Test
- Revision Test
- Course Test
- Test Series
- Custom Teacher Test

### Test Features

- Timer
  - Question navigation
  - Mark for review
  - Skip
  - Auto-save
  - Auto-submit
  - Negative marking, if required
  - Automatic evaluation
  - Manual evaluation where needed
- 

## 5. Result & Ranking System

Test ke baad student ko:

- Marks

- Percentage
- Rank
- Percentile
- Accuracy
- Correct answers
- Wrong answers
- Unattempted questions
- Time taken

milenge.

Detailed Analysis

text

|              |                                                                                       |
|--------------|---------------------------------------------------------------------------------------|
| Algebra      | 82%                                                                                   |
| Trigonometry | 76%                                                                                   |
| Calculus     | 48%  |
| Matrices     | 71%                                                                                   |

System identify karega:

Weak Topic: Calculus

6.  Mistake Book

Student ke incorrect questions automatically save ho sakte hain.

Mistake Categories

- Concept Error
- Formula Error
- Calculation Error
- Sign Error
- Silly Mistake
- Time Management

Student:

My Mistakes → Practice Again

kar sakega.

## 7. 🎯 Weak Topic & Mastery System

Har student ka Mathematics Mastery Map:

text

Mathematics

|   |              |     |   |
|---|--------------|-----|---|
|   |              |     |   |
| — | Algebra      | 82% | ● |
| — | Trigonometry | 76% | ● |
| — | Calculus     | 48% | ● |
| — | Matrices     | 71% | ● |
| — | Probability  | 64% | ● |

System weak areas ke according practice recommend karega.

## 8. 📈 Student Progress

Student dekh sake:

- Course progress
- Chapter progress
- Topic mastery
- Test improvement
- Practice accuracy
- Study time
- Attendance
- Completed lectures
- Completed tests
- Weak topics
- Improvement timeline

## 9. 🧠 Formula Bank

Searchable Mathematics formula library:

- Trigonometry
- Algebra
- Calculus
- Matrices

- Probability
- Coordinate Geometry
- etc.

Features:

- Search
- Category
- Favourite
- Quick revision

---

## 10. 🤖 AI Mathematics Engine

AI ko separate chatbot nahi, **learning engine** ki tarah integrate karenge.

text

AI ENGINE

```
|
|—— Maths Question Solver
|—— Photo Question Solver
|—— Step-by-Step Solution
|—— Hint Generator
|—— Concept Explanation
|—— Similar Question Generator
|—— AI Question Generator
|—— Mistake Analyzer
|—— Weak Topic Detector
|—— Personalized Practice
|—— Study Planner
```

---

## 11. 📷 AI Photo Doubt Solver

Student question ki photo upload kare:

text

```
Question Photo
 ↓
Image Processing
 ↓
Math Problem Recognition
 ↓
AI Solver
 ↓
```

Step-by-Step Solution

Concept

Common Mistake

Similar Questions

Student ko sirf final answer nahi, **solution process** milega.

---

## 12. Ask Teacher / Doubt Escalation

Agar AI se doubt solve nahi hua:

text

AI Doubt

Still Confused?

Ask Teacher

Teacher receives doubt

Teacher replies

Teacher AI ke answer ko bhi review kar sakta hai.

---

## 13. Notification System

Notifications:

- New Course
- New Lecture
- Upcoming Class
- Test Reminder
- Result Published
- New Material
- Practice Reminder
- Course Expiry
- Payment Confirmation
- Important Announcement

- Teacher Message

Push notifications ke liye Firebase Cloud Messaging use kiya ja sakta hai.

## 14. Admin Management System

Admin ke paas complete coaching control hoga.

text

ADMIN DASHBOARD

- |
- |—— Dashboard
- |—— Students
- |—— Parents
- |—— Teachers
- |—— Batches
- |—— Courses
- |—— Online Course Store
- |—— Course Purchases
- |—— Orders
- |—— Coupons
- |—— Classes
- |—— Attendance
- |—— Biometric
- |—— Question Bank
- |—— Practice Sets
- |—— Tests
- |—— Results
- |—— Rankings
- |—— Study Material
- |—— Videos
- |—— Fees
- |—— Payments
- |—— Notifications
- |—— Doubts
- |—— AI Management
- |—— Analytics
- |—— Reports
- |—— Settings

## 15. Admin Course Store Management

Admin course create kar sake:

text

Create Course  
↓  
Course Information  
↓  
Class / Board  
↓  
Chapters  
↓  
Topics  
↓  
Videos  
↓  
PDFs  
↓  
Practice  
↓  
Tests  
↓  
Price  
↓  
Validity  
↓  
Publish

### Admin manage karega:

- Course price
- Discount
- Coupon
- Course validity
- Demo lecture
- Course visibility
- Published/unpublished
- Student enrollments
- Purchases
- Revenue
- Refunds

## 16. Teacher Panel

text

## TEACHER DASHBOARD

- |
- |—— My Batches
- |—— Students
- |—— Attendance
- |—— Chapters
- |—— Topics
- |—— Questions
- |—— Practice Sets
- |—— Tests
- |—— Results
- |—— Solutions
- |—— Doubts
- |—— Weak Students
- |—— Student Progress
- |—— Analytics

Teacher dekh sakega:

Kaunsa student kis topic mein weak hai?

Example:

text

Rahul

|              |                                                                                         |
|--------------|-----------------------------------------------------------------------------------------|
| Algebra      | 82%                                                                                     |
| Trigonometry | 76%                                                                                     |
| Calculus     | 48%  |
| Matrices     | 71%                                                                                     |

Teacher:

**Calculus → Targeted Practice → Assign to Rahul**

kar sakega.

## 17. Parent Portal

Initially separate app ki zarurat nahi.

Web portal ya Student App ke controlled **Parent Mode** se access diya ja sakta hai.

Parent देख सके:

- Attendance
- Test marks

- Rank
  - Percentile
  - Performance
  - Weak Topics
  - Improvement
  - Fees
  - Upcoming Tests
  - Teacher Remarks
  - Notifications
- 

## 18. 🏠 Offline Coaching Management

Local students ke liye:

- Admission
  - Student ID
  - Batch
  - Timetable
  - Attendance
  - Biometric
  - Fees
  - Tests
  - Results
  - Parent information
  - Notifications
- 

## 19. 🌐 Online Student Management

Bahar ka student:

text

```
Website/App
 ↓
Register
 ↓
Browse Courses
 ↓
```

Uske liye physical batch ki requirement nahi hogi.

## 20. Hybrid Student

Ye bhi important hai.

Example:

Motihari ka student offline coaching karta hai + online revision course purchase karta hai.

Uska account:

text

## 21. Biometric Attendance Integration

text

Machine purchase karne se pehle **brand, model aur API/SDK** verify karna hoga.

## 22. 💰 Fees & Payment System

### Offline

- Admission fees
- Monthly fees
- Installments
- Pending fees
- Payment history

### Online

- Course purchase
- Test series
- Orders
- Coupons
- Discounts
- Refunds
- Course validity

### Payment Flow

text

```
graph TD
 A[Payment Gateway] --> B[Webhook]
 B --> C[Backend Verification]
 C --> D[Payment Confirmed]
 D --> E[Enrollment]
 E --> F[Course Unlock]
```

## 23. Public Website

### Main pages

- Home
- About DK Mishra
- Courses
- Course Details
- Test Series
- Results
- Faculty
- Testimonials
- Blog/Updates
- Contact
- Login
- Register

### Most important:

#### Online Course Store

jahan India ke kisi bhi city ka student course purchase kar sake.

---

## 24. Student Web Portal

Android app ke saath web access bhi:

text

student.domain.com

### Features:

- Dashboard
- Courses
- Classes
- Videos
- Practice
- Tests

- Results
- AI Doubt
- Progress
- Profile

## 25. Backend

Recommended:

text

Node.js  
Express.js  
TypeScript  
REST API  
PostgreSQL  
Prisma  
JWT  
Refresh Tokens

Architecture:

text

## 26. 🗄 Database

### PostgreSQL + Prisma

Initial major tables:

text

```
users
students
parents
teachers
admins

batches
courses
course_chapters
topics
subtopics

course_enrollments
course_progress

questions
question_options
question_solutions

practice_sets
practice_questions
practice_attempts

tests
test_questions
test_attempts
test_results

attendance
biometric_logs

fees
payments
orders
order_items
coupons
```

```
study_materials
videos

student_progress
topic_mastery
mistakes

doubts
ai_solutions

notifications
```

Additional tables requirements ke according add hongi.

---

## 27. ☁️ Video & File Storage

Database mein actual videos nahi rakhenge.

text

Files:

- Videos
- PDFs
- Images
- Question images
- Certificates
- Documents

cloud/object storage mein rahenge.

---

## 28. 🔒 Authentication & Security

- JWT

- Refresh Token
- Role Based Access Control
- Admin permissions
- Teacher permissions
- Parent permissions
- Student permissions
- Secure password hashing
- API rate limiting
- Input validation
- Payment webhook verification
- Database backups
- Audit logs

## 29. 🛎 Notification Service

text

Backend

|

Firebase Cloud Messaging

|

|—— Android Student

|—— Teacher

|—— Parent

## 30. 👑 Super Admin

Initially optional.

Future mein:

text

SUPER ADMIN

|

|—— Motihari Branch

|—— Branch 2

|—— Branch 3

|—— All Students

## 31. Advanced Analytics

### Student

- Accuracy
- Speed
- Weak topics
- Strong topics
- Improvement
- Test history
- Practice history

### Batch

- Average marks
- Attendance
- Weak chapters
- Test performance

### Teacher

- Batch performance
- Student improvement
- Test performance

### Institute

- Total students
- Active students
- Online students
- Offline students
- Course sales
- Revenue
- Attendance

- Test activity

### 32. 🤖 AI Analytics

AI student performance analyse karke:

“Rahul ne last 4 tests mein Calculus mein 52%, 48%, 55%, 49% score kiya. Targeted revision aur 20 practice questions recommend kiye gaye hain.”

Is tarah AI **actionable recommendation** dega.

### 33. 📱 Actual Applications / Services

Final system mein:

| Component           | Technology/Type                |
|---------------------|--------------------------------|
| Student Android App | React Native                   |
| Admin Panel         | React + TypeScript             |
| Teacher Panel       | React + TypeScript             |
| Parent Portal       | React Web                      |
| Public Website      | React + Vite                   |
| Student Web Portal  | React                          |
| Backend             | Node.js + Express + TypeScript |
| Database            | PostgreSQL                     |
| ORM                 | Prisma                         |
| Authentication      | JWT + Refresh Token            |
| Storage             | S3-compatible Object Storage   |
| Push Notification   | Firebase FCM                   |
| AI                  | LLM + Vision APIs              |
| Payment             | Payment Gateway                |
| Biometric           | Device API/SDK                 |
| Deployment          | Vercel + Railway/AWS           |
| Source Control      | GitHub                         |

### 34. 🏗️ Final Architecture

### 35. 🚀 Development Phases

#### Phase 1 — Foundation

Students  
Teachers  
Parents  
Batches  
Courses  
Chapters  
Topics

## Phase 2 — LMS + Mathematics

text

Videos  
Study Material  
Question Bank  
Practice  
Tests  
Results  
Solutions  
Rank

## Phase 3 — Online Course Selling

text

Course Store  
Course Details  
Orders  
Payment  
Coupons  
Enrollment  
Course Validity  
Invoices

## Phase 4 — Coaching ERP

text

Attendance  
Biometric  
Fees  
Notifications  
Parent Portal  
Reports

## Phase 5 — Intelligence

text

Weak Topics  
Mistake Book  
Mastery  
Analytics  
Personalized Practice

## Phase 6 — AI

text

AI Doubt  
Photo Solver  
Step-by-Step Solution  
Similar Questions  
AI Question Generator  
AI Analysis  
Study Planner

## Phase 7 — Production

text

React Native App  
Play Store  
Production Server  
Database Backup  
Security  
Monitoring  
Crash Reporting  
Performance Optimization

## Final Product

Ab final scope ko ek line mein define karein to:

**DK Mishra Mathematics ka ek complete digital ecosystem jisme offline coaching management, online course selling, Mathematics LMS, tests & assessment, biometric attendance, parent monitoring, AI doubt solving, personalized learning, analytics aur Android application sab ek single platform se manage honge.**

Aur **sabse important change** ye hai ki ab system sirf Motihari ke students ke liye nahi hoga:

text

Is updated scope ko hi ab “Master System Requirement” maan kar aage database design, UI design aur development roadmap banana sabse sahi rahega.

2026-09-26 06:42:27 You

ab mujhe sir ko isme se sirf ye ye chij batani h app ki fetures, admin me kya kya rhega ye or teacher ke liye kya kya rhega ye or parent ke liye kya kya rhega ye bs

ChatGPT gpt-5-6

Bilkul. Sir ko batane ke liye **technical/database wali details hata kar**, sirf **App + Admin + Teacher + Parent** ke features ko simple format mein rakhte hain.

## DK Mishra Mathematics – Software Features

### 1. Student App – Main Features

#### Student Dashboard

- Today's Classes
- Upcoming Tests
- Pending Practice
- Recent Test Results

- Attendance
- Weak Topics
- Recommended Practice
- Notifications
- AI Doubt Solver

## Online Courses

- Online Courses dekhna
- Course Details & Demo Lecture
- Course Purchase
- Online Payment
- Purchased Courses
- Course Validity / Expiry
- Video Lectures
- PDF / Study Material
- Chapter & Topic-wise Learning
- Live Classes
- Recorded Classes

## Practice

- Topic-wise Practice
- Chapter-wise Practice
- Daily Practice
- Weak Topic Practice
- Mistake-based Practice
- Custom Practice
- Easy / Medium / Hard Questions
- Recommended Practice

## Tests

- Topic Test
- Chapter Test
- Full Mathematics Test
- Mock Test

- Revision Test
- Course/Test Series Test
- Timer
- Mark for Review
- Auto Submit
- Automatic Result
- Detailed Test Analysis

## Results & Performance

- Marks
- Percentage
- Rank
- Percentile
- Accuracy
- Correct / Wrong / Unattempted
- Time Analysis
- Chapter-wise Performance
- Topic-wise Performance
- Progress Tracking

## Mistake Book

- Wrong Questions Save
- Mistake Type:
  - Concept Mistake
  - Formula Mistake
  - Calculation Mistake
  - Sign Mistake
  - Silly Mistake
  - Time Management
- Same Questions ko dobara practice karna

## Weak Topic & Progress

- Weak Topics identify karna
- Topic Mastery

- Improvement Tracking
- Personalized Practice
- Recommended Questions
- Revision Suggestions

## AI Mathematics Features

- AI Doubt Solver
- Photo se Question Solve
- Step-by-Step Solution
- Hint System
- Concept Explanation
- Similar Questions
- AI-generated Practice Questions
- Mistake Analysis
- Personalized Study Plan

## Ask Teacher

- Student AI se doubt pooch sakta hai
- Agar AI se doubt clear na ho → **Ask Teacher**
- Teacher student ko solution/reply de sakta hai

## Notifications

- New Class
- New Course
- New Lecture
- Test Notification
- Result
- Study Material
- Practice
- Important Announcement
- Course Expiry
- Teacher Message

## 2. Admin Panel – Sir ke liye

### Dashboard

- Total Students
- Online Students
- Offline Students
- Hybrid Students
- Total Courses
- Course Sales
- Tests
- Attendance
- Fees
- Overall Performance

### Student Management

- Add/Edit/Delete Students
- Student Profile
- Batch Assign
- Parent Details
- Student Performance
- Attendance
- Fees
- Courses
- Test Results

### Teacher Management

- Add Teachers
- Teacher Profile
- Assign Batches
- Assign Chapters/Topics
- Teacher Performance
- Student Management

### Batch Management

- Create Batches
- Assign Students
- Assign Teacher
- Timetable
- Batch-wise Attendance
- Batch-wise Results

## **Course Management**

- Create Online Course
- Chapters
- Topics
- Videos
- PDFs
- Practice Sets
- Tests
- Course Price
- Discount
- Course Validity
- Demo Lecture
- Publish/Unpublish Course

## **Online Course Store**

- Course Sales
- Orders
- Payments
- Coupons
- Enrollments
- Course Expiry
- Refund Status
- Revenue Reports

## **Question Bank**

- Questions Add/Edit
- Chapter/Topic wise Questions

- Difficulty Level
- Solutions
- Question Images
- Practice Sets

## **Test Management**

- Create Tests
- Topic Tests
- Chapter Tests
- Full Tests
- Mock Tests
- Assign Tests
- Results
- Solutions
- Rankings

## **Results & Analytics**

- Student Performance
- Batch Performance
- Topic Performance
- Chapter Performance
- Weak Students
- Weak Topics
- Test Analysis
- Improvement Reports

## **Attendance**

- Manual Attendance
- Biometric Attendance
- Student Attendance History
- Batch Attendance
- Attendance Reports

## **Fees & Payments**

- Admission Fees
- Monthly Fees
- Installments
- Pending Fees
- Payment History
- Online Course Payments

### Communication

- Push Notifications
- Student Announcements
- Parent Notifications
- Teacher Messages
- Important Notices

### AI Management

- AI Doubt Monitoring
  - AI Question Generation
  - AI Solution Management
  - AI Performance Analysis
  - AI-generated content control
- 

## 3. Teacher Panel – Teacher ke liye

### Dashboard

- My Batches
- My Students
- Today's Classes
- Upcoming Tests
- Attendance
- Student Performance
- Pending Doubts

### Student Management

- Students List

- Student Profile
- Attendance
- Test Results
- Practice Performance
- Weak Topics
- Progress

## Teaching

- Chapters
- Topics
- Study Material
- Videos
- Notes
- Question Bank

## Practice Sets

- Practice Set Create
- Topic-wise Questions
- Chapter-wise Questions
- Practice Assign
- Student Practice Results

## Tests

- Test Create
- Questions Add
- Test Assign
- Test Schedule
- Test Results
- Test Solutions

## Student Analysis

Teacher dekh sakega:

- Kaun sa student weak hai
- Kis chapter mein weak hai

- Kis topic mein weak hai
- Kis type ki mistakes kar raha hai
- Test performance
- Practice performance
- Improvement

### Targeted Practice

Teacher kisi student ke weak topic ke according:

- Practice assign kar sakta hai
- Questions assign kar sakta hai
- Retest le sakta hai

### Doubt Management

- Student Doubts
- AI se solved doubt dekhna
- Teacher ka own solution dena
- Student ko reply karna

### Attendance

- Student Attendance
- Batch Attendance
- Attendance History

## 4. Parent Panel

Parent ko mainly **child ki progress aur performance** dikhai jayegi.

### Child Dashboard

- Overall Performance
- Attendance
- Upcoming Tests
- Recent Results
- Improvement

### Test Performance

- Test Marks

- Percentage
- Rank
- Percentile
- Correct/Wrong Questions
- Chapter-wise Performance
- Topic-wise Performance

## Weak Topics

- Child ke Weak Topics
- Improvement Status
- Recommended Practice
- Mistake Overview

## Attendance

- Daily Attendance
- Attendance Percentage
- Attendance History

## Fees

- Total Fees
- Paid Fees
- Pending Fees
- Payment History

## Notifications

- Important Announcements
- Test Notifications
- Results
- Attendance Alerts
- Teacher Remarks

## Teacher Communication

- Teacher Remarks
- Student Performance Feedback
- Important Messages

## Sir ko ek line mein system aise explain kar sakte ho:

**Student App:** Learning + Courses + Practice + Tests + Results + Attendance + AI Doubt + Personalized Learning

**Admin Panel:** Complete Coaching Management + Students + Teachers + Courses + Tests + Attendance + Fees + Payments + Analytics

**Teacher Panel:** Classes + Students + Practice + Tests + Doubts + Attendance + Student Performance & Weak Topic Analysis

**Parent Panel:** Child ki Attendance + Marks + Rank + Performance + Weak Topics + Fees + Teacher Remarks + Notifications
